Report on Limited Review of Condensed Consolidated Interim Financial Statements

(Translation from the original in Spanish. In the event of discrepancy, the Spanish-language version prevails.)

To the Shareholders of Banco Bilbao Vizcaya Argentaria, S.A.
commissioned by its Board of Directors

REPORT ON THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

Introduction

We have carried out a limited review of the accompanying condensed consolidated interim financial statements (hereinafter the “interim financial statements”) of Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter the “Bank”) and its subsidiaries which, together with the Bank, form the Banco Bilbao Vizcaya Argentaria Group (hereinafter the “Group”), which comprise the balance sheet at September 30, 2021, and the income statement, statement of recognized income and expense, statement of changes in equity and statement of cash flows for the nine-month period then ended, all condensed and consolidated, and the accompanying notes to the condensed consolidated interim financial statements. The Directors of the Bank are responsible for the preparation of these interim financial statements in accordance with International Accounting Standard (IAS) 34 Interim Financial Reporting as adopted by the European Union, pursuant to article 12 of Royal Decree 1362/2007 as regards the preparation of condensed interim financial information. Our responsibility is to express a conclusion on these interim financial statements based on our limited review.

Scope of Review

We conducted our limited review in accordance with International Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A limited review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A limited review is substantially less in scope than an audit conducted in accordance with prevailing legislation regulating the audit of accounts in Spain and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the accompanying interim financial statements.

(Translation from the original in Spanish. In the event of discrepancy, the Spanish-language version prevails.)

Conclusion

Based on our limited review, which can under no circumstances be considered an audit, nothing has come to our attention that causes us to believe that the accompanying interim financial statements for the nine-month period ended September 30, 2021 have not been prepared, in all material respects, in accordance with International Accounting Standard (IAS) 34 Interim Financial Reporting as adopted by the European Union, pursuant to article 12 of Royal Decree 1362/2007 as regards the preparation of condensed interim financial statements.

Emphasis of Matter

We draw your attention to the accompanying note 1, which states that these interim financial statements do not include all the information that would be required in a complete set of consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union. The accompanying interim financial statements should therefore be read in conjunction with the Group's consolidated annual accounts for the year ended December 31, 2020. This matter does not modify our conclusion.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

The accompanying consolidated interim management report for the nine-month period ended September 30, 2021 contains such explanations as the Directors of the Bank consider relevant with respect to the significant events that have taken place in this period and their effect on the interim financial statements, and as regards the disclosures included pursuant to article 15 of Royal Decree 1362/2007. The consolidated interim management report is not an integral part of the interim financial statements. We have verified that the accounting information contained therein is consistent with that disclosed in the interim financial statements for the nine-month period ended September 30, 2021. Our work is limited to the verification of the consolidated interim management report within the scope described in this paragraph and does not include a review of information other than that obtained from the accounting records of Banco Bilbao Vizcaya Argentaria, S.A. and subsidiaries.

Other Matter

This report has been prepared at the request of the Bank's Board of Directors in relation to the publication of the quarterly financial report voluntarily prepared by the Directors of the Bank.

KPMG Auditores, S.L.

The accompanying Notes and Appendices are an integral part of the condensed interim consolidated financial statements as of and for the nine months ended September 30, 2021.

Notes to the condensed interim consolidated financial statements as of and for the nine months ended September 30, 2021

1. Introduction, basis for the presentation of the condensed interim consolidated financial statements and other information

1.1. Introduction

Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter "the Bank", "BBVA" or "BBVA, S.A.") is a private-law entity subject to the laws and regulations governing banking entities operating in Spain. It carries out its activity through branches and agencies across the country and abroad.

The Bylaws and other public information are available for inspection at the Bank's registered address (Plaza San Nicolás, 4, Bilbao) as noted on its web site (www.bbva.com).

In addition to the activities it carries out directly, the Bank heads a group of subsidiaries, joint ventures and associates which perform a wide range of activities and which together with the Bank constitute the Banco Bilbao Vizcaya Argentaria Group (hereinafter, "the Group" or "the BBVA Group"). In addition to its own separate financial statements, the Bank is required to prepare consolidated financial statements comprising all consolidated subsidiaries of the Group.

The consolidated financial statements of the BBVA Group for the year ended December 31, 2020 were approved by the shareholders at the Annual General Meeting ("AGM") on April 20, 2021.

1.2. Basis for the presentation of the condensed interim consolidated financial statements

The BBVA Group's condensed interim consolidated financial statements (hereinafter, the "Consolidated Financial Statements") as of and for the nine-month period ended September 30, 2021 are presented in accordance with the International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") and have been approved by the Board of Directors at its meeting held on October 28, 2021. In accordance with IAS 34, the interim financial information is prepared solely for the purpose of updating the last annual consolidated financial statements, focusing on new activities, events and circumstances that occurred during the period without duplicating the information previously published in those consolidated financial statements.

Therefore, the accompanying Consolidated Financial Statements do not include all information required by a complete set of consolidated financial statements prepared in accordance with International Financial Reporting Standards endorsed by the European Union (hereinafter, "EU-IFRS"), consequently for an appropriate understanding of the information included in them, they should be read together with the consolidated financial statements of the Group as of and for the year ended December 31, 2020.

The aforementioned annual consolidated financial statements were prepared in accordance with the EU-IFRS applicable as of December 31, 2020, considering the Bank of Spain Circular 4/2017, and with any other legislation governing financial reporting which is applicable and with the format and mark-up requirements established in the EU Delegated Regulation 2019/815 of the European Commission.

The accompanying Consolidated Financial Statements were prepared applying principles of consolidation, accounting policies and valuation criteria, which, as described in Note 2, are the same as those applied in the consolidated financial statements of the Group as of and for the year ended December 31, 2020, taking into consideration the new Standards and Interpretations that became effective from January 1, 2021 (see Note 2.1), so that they present fairly the Group's consolidated equity and financial position as of September 30, 2021, together with the consolidated results of its operations and the consolidated cash flows generated by the Group during the nine months ended September 30, 2021.

The Consolidated Financial Statements and explanatory notes were prepared on the basis of the accounting records kept by the Bank and each of the other entities in the Group. They include the adjustments and reclassifications required to harmonize the accounting policies and valuation criteria used by the entities in the Group.

All effective accounting standards and valuation criteria with a significant effect in the Consolidated Financial Statements were applied in their preparation.

The amounts reflected in the accompanying Consolidated Financial Statements are presented in millions of euros, unless it is more appropriate to use smaller units. Therefore, some items that appear without a balance in these Consolidated Financial Statements are due to how the units are expressed. Also, in presenting amounts in millions of euros, the accounting balances have been rounded up or down. It is therefore possible that the totals appearing in some tables are not the exact arithmetical sum of their component figures.

The percentage changes in amounts have been calculated using figures expressed in thousands of euros.

When determining the information to disclose about various items of the Consolidated Financial Statements, the Group, in accordance with IAS 34, has taken into account their materiality in relation to the Consolidated Financial Statements.

1.3. Comparative information

The information included in the accompanying Consolidated Financial Statements and the explanatory notes relating to December 31, 2020 and September 30, 2020, is presented for the purpose of comparison with the information for September 30, 2021.

Sale of BBVA's U.S. subsidiary to PNC Financial Service Group

As mentioned in Note 3, in 2020, BBVA reached an agreement to sell its entire stake in BBVA USA Bancshares, Inc., which in turn owns all the capital stock of the bank, BBVA USA, as well as other companies of the BBVA Group in the United States with activities related to this banking business. On June 1, 2021 and once the mandatory authorizations had been obtained, BBVA completed the sale.

As required by IFRS 5 "Non-current assets held for sale and discontinued operations", the balances of assets and liabilities corresponding to such companies for sale were reclassified from their corresponding accounting headings to the headings "Non-current assets and disposal groups classified as held for sale" and "Liabilities included in disposal groups classified as held for sale" respectively, in the consolidated balance sheet as of December 31, 2020. Similarly, as required by the aforementioned IFRS 5, the results generated by these companies for the first five months of 2021 are presented in the heading "Profit (loss) after taxes from discontinued operations" of the condensed consolidated income statement for such period, and in the heading "Non-current assets and disposal groups classified as held for sale" of the condensed consolidated statements of recognized income and expense for such period. Additionally, the results corresponding to the first nine months of 2020 have been reclassified, to facilitate the comparison between periods, to those same sections of the respective condensed consolidated income statements and condensed consolidated statements of recognized income and expense for that period. Finally, the total consideration received in cash for the sale of BBVA's business in the United States has been recorded under the heading of "Divestments - Non-current assets classified as held for sale and associated liabilities" of the condensed consolidated cash flow statements for the nine months ended September 30, 2021.

Note 19 shows a breakdown of the financial information of the companies sold in the United States as of December 31, 2020 and their results for the first five months of 2021 and the first nine months of 2020.

1.4. Management and impacts of the COVID-19 pandemic

The appearance of the Coronavirus COVID-19 in China and its global expansion to a large number of countries, motivated the viral outbreak was classified as a global pandemic by the World Health Organization since last March 11, 2020. The pandemic has affected the world economy and economic activity and conditions in the countries in which the Group operates. The governments of the different countries in which the Group operates adopted different measures that conditioned the evolution (see Note 6.2).

In this pandemic situation, BBVA focused its attention on ensuring the continuity of the business operational security as a priority and monitoring the impacts on the business and on the risks of the Group (such as the impacts on results, capital or liquidity). Additionally, BBVA adopted from the beginning a series of measures to support its main interest groups. In this sense, the purpose and the Group's long-term strategic priorities remain the same and are even reinforced, with a commitment to technology and data-driven decision-making.

With the aim of mitigating the impact of COVID-19, various European and International bodies made pronouncements aimed at allowing greater flexibility in the implementation of the accounting and prudential frameworks. The BBVA Group took these pronouncements into consideration when preparing this report.

The main impacts of COVID-19 pandemic in the BBVA Group's Consolidated Financial Statements are detailed in the following explanatory notes:

- Note 1.5 includes information on the consideration of the COVID-19 pandemic in the estimates made.
- Note 6.1 details the main risks associated with the pandemic as well as the impacts that have occurred both in the activity and in the Consolidated Financial Statements as of and for the nine months ended September 30, 2021.
- Note 6.2 includes information related to the initiatives carried out by the Group to help the most affected clients, jointly with the measures of the corresponding governments. Likewise, it contains, among others, information regarding the number of operations and the amount corresponding to payment deferrals' measures, both public and private, granted by the Group worldwide.

1.5. Responsibility for the information and for the estimates made

The information contained in the BBVA Group's Consolidated Financial Statements is the responsibility of the Group's Directors.

Estimates were required to be made at times when preparing these Consolidated Financial Statements in order to calculate the recorded or disclosed amount of some assets, liabilities, income, expense and commitments. These estimates relate mainly to the following:

- Loss allowances on certain financial assets (see Notes 6, 12 and 13).
- The assumptions used to quantify certain provisions (see Notes 21 and 22) and for the actuarial calculation of post-employment benefit liabilities and other commitments (see Note 23).
- The useful life and impairment losses of tangible and intangible assets (see Notes 15, 16 and 19).
- The valuation of goodwill and price allocation of business combinations (see Note 16).
- The fair value of certain unlisted financial assets and liabilities (see Note 7).
- The recoverability of deferred tax assets (see Note 17).

As mentioned before, on March 11, 2020, COVID-19 was declared a global pandemic by the World Health Organization (see Note 1.4). The significant uncertainty associated to the unprecedented nature of this pandemic entails a greater complexity of developing reliable estimations and applying judgment.

Therefore, these estimates have been made on the basis of the best available information on the matters analyzed, as of September 30, 2021. However, it is possible that events may take place in the future which could make it necessary to amend these estimations (upward or downward), which would be carried out prospectively, recognizing the effects of the change in estimation in the corresponding consolidated income statement.

During the nine-month period ended on September 30, 2021 there have been no significant changes in the estimates made at the end of the 2020 financial year, other than those indicated in these Consolidated Financial Statements.

1.6. Related party transactions

The information related to these transactions is presented in Note 53 of the consolidated financial statements of the Group for the year ended December 31, 2020.

As financial institutions, BBVA and other entities in the Group engage in transactions with related parties in the regular course of their business. None of these transactions are considered significant and the transactions are carried out under normal market conditions.

1.7. Separate condensed interim financial statements

The separate financial statements of the parent company of the Group (Banco Bilbao Vizcaya Argentaria, S.A.) are prepared under Spanish regulations (Circular 4/2017 of the Bank of Spain, as amended thereafter, and following other regulatory requirements of financial information applicable to it).

Appendix I shows the interim financial statements of Banco Bilbao Vizcaya Argentaria, S.A. as of and for the nine-months ended September 30, 2021.

2. Principles of consolidation, accounting policies, measurement bases applied and recent IFRS pronouncements and interpretations

The accounting policies and methods applied for the preparation of the accompanying Consolidated Financial Statements do not differ significantly to those applied in the consolidated financial statements of the Group for the year ended December 31, 2020 (Note 2), except for the entry into force of new standards and interpretations in the year 2021.

2.1. Standards and interpretations that became effective in the first nine months of 2021

The following amendments to the IFRS standards or their interpretations (hereinafter "IFRIC") became effective on or after January 1, 2021:

IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 - Modifications - IBOR reform

On August 27, 2020, the International Accounting Standards Board (hereinafter, "IASB") issued the second phase of the IBOR reform which involves the introduction of amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, to ensure that the financial statements reflect the economic effects of the IBOR reform.

These modifications focus on accounting for financial instruments, once a new risk-free benchmark has been introduced (Risk Free Rate, hereinafter "RFR"). The modifications introduce the accounting relief for changes in the cash flows of financial instruments directly caused by the IBOR reform if they take place in a context of "economic equivalence", by updating the effective interest rate of the instrument. Additionally, they introduced a series of reliefs to the hedging requirements so as not to have to interrupt certain hedging relationships when the new benchmark is introduced. However, similar to the Phase 1 amendments (which entered into force in 2020), the Phase 2 amendments do not provide for exceptions to the measurement requirements applicable to hedged items and hedging instruments in accordance with IFRS 9 or IAS 39. Thus, once the new benchmark has been implemented, the hedged items

and hedging instruments must be measured according to the new index, and the possible ineffectiveness that may exist in the hedge will be recognized in profit or loss.

The IBOR transition to RFRs is considered to be a complex initiative, which affects BBVA Group in different geographical areas and business lines, as well as in a multitude of products, systems and processes. The main risks to which the Group is exposed due to the transition are: (1) risk of litigation related to the products and services offered by the Group; (2) legal risks derived from changes in the documentation required for existing operations; (3) financial and accounting risks, derived from market risk models and from the measurement, hedging, cancellation and recognition of the financial instruments associated with the benchmark indices; (4) price risk, derived from how changes in the indices could impact the pricing mechanisms of certain instruments; (5) operational risks, as the reform may require changes to the Group's IT systems, business reporting infrastructure, operational processes and controls, and (6) behavioral risks derived from the potential impact of customer communications during the transition period, which could lead to customer complaints, regulatory penalties or reputational impact.

BBVA Group has a significant number of financial assets and liabilities referenced to IBOR rates, especially EURIBOR, which are used, among others, in loans, deposits, debt issuances and financial derivatives. Furthermore, although the exposure to EONIA is lower in the banking book, this benchmark interest rate is used in financial derivatives in the trading book, as well as in the collateral agreements mostly are booked in Spain. In the case of LIBOR, even with the divestiture of BBVA USA by the Group in June 2021, which has significantly reduced the exposure to LIBOR USD, the USD continues to be the most relevant currency for both loans and debt instruments in the banking book and in the trading book. Other LIBOR currencies (CHF, GBP and JPY) have a much lower exposure.

BBVA Group established an IBOR transition program, provided with a robust governance structure by means of an Executive Steering Committee, with representation from senior management of the affected areas, which reports directly to the Group's Global Leadership Team. At the local level, each geography has defined a local governance structure with the participation of senior management. The coordination between geographies is realized through the Project Management Office (PMO) and the Global Working Groups that incorporate a multi-geographic and transversal view on the areas of Legal, Risk, Regulatory, Engineering, Finance and Accounting. The project also involves both Corporate Assurance of the different geographies and business lines and Global Corporate Assurance of the Group.

The IBOR transition project within BBVA Group takes into account the different approaches and timings of transition to the new RFRs when evaluating different risks associated with the reform, as well as defining the lines of action to mitigate them. BBVA is aligned with the Good Practices issued by the European Central Bank (hereinafter "ECB") that outline how banks can better structure their governance, identify related risks and create contingent action plans and documentation in relation to the transition of reference rates.

A relevant aspect of this transition is its impact on contracts referenced to LIBOR and EONIA maturing after December 31, 2021 (when most indices disappear) and June 30, 2023 (in the case of dollar LIBOR except 1-week and 2-month).

In the case of the EONIA, the Group is carrying out the novation of the contracts maturing after 2021 (it should be noted that these exposures are immaterial in the Group and mostly against clearing houses) and has already begun, proactively, the renegotiation of collateral contracts to adapt them to the operations against clearing houses already migrated in July 2020. The Group already has new fallbacks in place which incorporate the €STR as a replacement rate, as well as language to incorporate this benchmark as the main reference rate in new contracts.

In the case of LIBOR, the Group has identified the population of contracts maturing after December 31, 2021 and June 30, 2023 (in the case of dollar LIBOR except 1-week and 2-month) and is working on the implementation of tools/systems that will allow the contracts to be migrated to solutions such as those proposed by ISDA (Group entities are already adhered to the ISDA protocol) or in bilateral negotiations. Likewise, BBVA Group continues to work on adapting all its systems and processes to deal with alternative Risk Free Rates, such as SOFR and SONIA. In this sense, BBVA is already operating and actively promoting the contracting of both, derivative products and loans, with Risk Free Rates indices. In addition, different controls have been established with the objective of promoting the non-issuance of products with LIBOR rates with expiration beyond 2021.

On the other hand, the Group continues to actively promote communication actions with its clients and counterparties to explain the impacts of the transition to the new benchmark on its operations.

In the case of EURIBOR, the European authorities have encouraged amendments of its methodology so that it complies with the requirements of the European Regulation on Benchmarks. BBVA actively participates in various working groups, including the EURO RFR WG which works specifically, amongst others, on the definition of fallbacks in contracts, in anticipation of an option to change the index in the future.

Amendments to IFRS 4 Insurance Contracts

The amendment to IFRS 4 includes a deferral in the temporary exception option regarding the application of IFRS 9 for entities whose business model is predominantly an insurance model until January 1, 2023, aligning it with the entry into force of the IFRS 17 Insurance Contracts rule. This modification is applicable from January 1, 2021, although it will not have an impact on the Group since the Bank does not take such an option.

IFRS 16 - Leases - COVID-19 modifications

The IASB has extended the term to qualify for the exemption that allows tenants not to register concessions in rents as a modification of the lease if they are a direct consequence of COVID-19. This exemption has not had an impact on the Group since the Bank has not received concessions on its rents as a result of COVID-19.

The application of the exemption will remain optional and applies to rent concessions made until June 30, 2022.

2.2. Standards and interpretations issued but not yet effective as of September 30, 2021

The following new International Financial Reporting Standards together with their Interpretations had been published at the date of preparation of the accompanying Consolidated Financial Statements, but are not mandatory as of September 30, 2021. Although in some cases the IASB allows early adoption before their effective date, the BBVA Group has not proceeded with this option for any such new standards.

IFRS 17 – Insurance contracts

IFRS 17 establishes the accounting principles for insurance contracts. This new standard supersedes IFRS 4, by introducing deep changes in the accounting of insurance contracts with the aim of achieving greater homogeneity and increasing comparability among entities.

Unlike IFRS 4, the new standard establishes minimum requirements for grouping insurance contracts for the purposes of their recognition and measurement, determining the units of account by considering three levels: portfolios (contracts subject to similar risks and managed together), annual cohorts and their possibility of becoming onerous.

Regarding the measurement model, the new standard contemplates several methods, being the General Model (Building Block Approach) the method that will be applied by default for the valuation of insurance contracts, unless the conditions are given to apply any of the two other methods: the Variable Fee Approach, and the Simplified Model (Premium Allocation Approach).

With the implementation of IFRS 17, the valuation of insurance contracts will be based on a model that will use updated assumptions at each balance sheet date.

The General Model requires entities to value insurance contracts for the total of:

- fulfillment cash flows, which comprise the estimation of future cash flows discounted to reflect the time value of money, the financial risk associated with future cash flows, and a risk adjustment for non-financial risk;
- and the contractual service margin, which represents the expected unearned benefit from the insurance contracts, which will be recognized in the entity's income statement as the service is provided in the future, instead of being recognized at the time of the estimation.

The amounts recognized in the income statement shall be classified into insurance revenue, insurance service expenses and insurance finance income or expenses. Insurance revenue and insurance service expenses shall exclude any investment components. Insurance revenue shall be recognized over the period the entity provides insurance coverage.

An entity shall apply IFRS 17 for annual reporting periods beginning on or after January 1, 2023 (with at least one year comparative information); however, the final adoption by the European Council and European Parliament and its subsequent publication in the Journal of the European Union are still pending, which is expected to be carried out at the latest in early 2022.

Since 2019, the Group has maintained a project to implement IFRS 17 in order to standardize the criteria in the Group and with the participation of all involved areas and countries.

Amendments to IAS 1 "Presentation of financial statements" and IAS 8 "Accounting policies, changes in accounting estimates and errors"

In February 2021 the IASB issued amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors with the aim of improving the quality of the disclosures in relation to the accounting policies applied by the entities with the ultimate aim of providing useful and material information in the Financial Statements.

The amendments to IAS 1 require companies to disclose their material accounting policy information rather than their significant accounting policies and include guidance on how to apply the concept of materiality to accounting policy disclosures. The amendments to IAS 8 also clarify how companies should distinguish changes in accounting policies from changes in accounting estimates. The amendments to IAS 1 and IAS 8 will be effective for annual reporting periods beginning on or after 1 January 2023, with early application permitted. No significant impact is expected on BBVA's consolidated financial statements.

Amendment to IAS 12 "Accounting for deferred tax"

In February 2021, the IASB has issued an amendment to IAS 12 that clarifies how companies account for deferred tax on transactions such as leases and decommissioning obligations.

The amendments clarify that companies are required to recognize deferred tax on such transactions. The aim of the amendments is to reduce diversity in the reporting of deferred tax on leases and decommissioning obligations. The amendments will be effective for annual reporting periods beginning on or after 1 January 2023, with early application permitted. No significant impact is expected on the BBVA Group's consolidated financial statements.

Minor changes to IFRS Standards and Annual Improvements to IFRS 2018-2020 (IFRS 1 - First application of IFRS, IFRS 9 Financial Instruments, IAS 41 Agriculture and modifications to the illustrative examples of IFRS 16 - Leases)

The IASB has issued minor amendments and improvements to various IFRSs to clarify the wording or correct minor consequences, oversights or conflicts between the requirements of the Standards. The modified standards are: IFRS 3 Business Combination, IAS 16 Property, Plant and Equipment, IAS 37 Provisions, Contingent Liabilities and Contingent Assets, IFRS 9 Financial Instruments, IFRS 16 Leases, IFRS 1 First Time Adoption of IFRS and IAS 41 Agriculture.

The amendments will be effective for annual reporting periods beginning on or after 1 January 2022. No significant impact is expected on the BBVA Group's consolidated financial statements.

3. BBVA Group

The BBVA Group is an international diversified financial group with a significant presence in retail banking, wholesale banking and asset management. The Group also operates in the insurance sector.

The following information is detailed in the Appendices to the consolidated financial statements of the Group for the year ended December 31, 2020:

- Appendix I shows relevant information related to the consolidated subsidiaries and structured entities.
- Appendix II shows relevant information related to investments in joint ventures and associates accounted for using the equity method.
- Appendix III shows the main changes and notification of investments and divestments in the BBVA Group.
- Appendix IV shows fully consolidated subsidiaries with more than 10% owned by non-Group shareholders.

The BBVA Group's activities are mainly located in Spain, Mexico, South America and Turkey, with an active presence in other areas of Europe, The United States and Asia (see Note 5).

Significant transactions in the first nine months of 2021

Divestitures

Sale of BBVA's U.S. Bancshares, Inc. to PNC Financial Service Group

On June 1 2021, after obtaining all the required authorizations, BBVA completed the sale to The PNC Financial Services Group, Inc. of 100% of the capital stock of its subsidiary BBVA USA Bancshares, Inc., which in turn owns all the capital stock of the bank, BBVA USA.

The consideration received in cash by BBVA, as a consequence of the referred sale, amounted to approximately 11,500 million USD (price provided in the agreement minus the agreed closing price adjustments) equivalent to approximately 9,600 million euros (with an exchange rate of 1.20 EUR / USD).

The accounting of both the results generated by BBVA USA Bancshares since the announcement of the transaction and of its closing, have had an aggregate positive impact on the BBVA Group's Common Equity Tier 1 ("fully loaded") ratio of approximately 294 basis points, which includes the generation of capital contributed by the subsidiary to the Group until the closing of the transaction (June 1, 2021) and a profit net of taxes of 582 million euros. Thus, the BBVA Group has been reflecting the results that BBVA USA Bancshares, Inc. has been generating, as well as the positive impact, mainly, of these results on the Common Equity Tier 1 ("fully loaded") ratio of BBVA Group. The calculation of the impact on Common Equity Tier 1 has been made taking into account the amount of the transaction in euros and BBVA's consolidated financial statements as of June 30, 2021.

The BBVA Group will continue to develop the institutional and wholesale business in the US that it currently carries out through its broker-dealer BBVA Securities Inc. and its branch in New York. BBVA will also maintain its investment activity in the fintech sector through its participation in Propel Venture Partners US Fund I, L.P.

Note 19 shows a breakdown of the financial information of the companies sold in the United States as of December 31, 2020 and the results for the first five months of 2021 and the first nine months of 2020.

Sale of the BBVA Group's stake in Paraguay

On January 22, 2021 and once the mandatory authorizations were obtained, BBVA completed the sale of its direct and indirect shareholding of 100% of the capital stock of Banco Bilbao Vizcaya Argentaria Paraguay, S.A. ("BBVA Paraguay") to Banco GNB Paraguay S.A., a subsidiary of the Gilinski Group. The total amount received by BBVA amounted to approximately 250 million US dollars (approximately 210 million euros). The transaction generated a capital loss net of taxes of approximately 9 million euros. Likewise, this transaction had a positive impact on the Common Equity Tier 1 ("fully loaded") of the BBVA Group of approximately 6 basis points, which is reflected in the capital base of the BBVA Group as of September 30, 2021.

Significant transactions in 2020

Divestitures

Alliance with Allianz, Compañía de Seguros y Reaseguros, S.A

On April 27, 2020, BBVA reached an agreement with Allianz, Compañía de Seguros y Reaseguros, S.A. to create a bancassurance joint venture in order to develop the non-life insurance business in Spain, excluding the health insurance line of the business.

On December 14, 2020, once the required authorizations had been obtained, BBVA completed the transaction and announced the transfer to Allianz, Compañía de Seguros y Reaseguros, S.A. of half plus one share of the company BBVA Allianz Seguros y Reaseguros, S.A., for which it received €274 million euros, without taking into account a variable part of the price (up to 100 million euros depending on certain objectives and planned milestones). This operation resulted in a profit net of taxes of 304 million euros and a positive impact on the fully loaded CET1 of the BBVA Group of 7 basis points recorded in the consolidated financial statements as of December 31, 2020.

4. Shareholder remuneration system

On January 29, 2021, BBVA communicated its intention to return in 2021 to its shareholder remuneration policy that consists of the distribution of an annual payout of between 35% and 40% of the profits obtained in each financial year fully in cash in two different payments (expected for October and April, subject to the applicable authorizations), provided that recommendation ECB/2020/62 was repealed and there were no additional restrictions or limitations.

The Annual General Meeting of BBVA held on April 20, 2021, approved, under item 3 of the Agenda, the cash distribution in the amount of €0.059 gross per share against the share premium account as shareholder remuneration in relation to the Group's result in the 2020 financial year per BBVA outstanding share, paid to shareholders on April 29, 2021.

The European Central Bank published on July 23, 2021, the approval of recommendation ECB/2021/31 repealing recommendation ECB/2020/62 with effect from September 30, 2021. Recommendation ECB/2021/31 establishes that the ECB will assess banks' capital, dividends distribution and share buybacks plans on an individual basis in the context of the normal supervisory cycle, and repeals any further restrictions on dividends and share buybacks contained in recommendation ECB/2020/62.

In line with the above, on September 30, 2021, BBVA announced that the Board of Directors of BBVA approved the payment in cash of €0.08 (€0.0648 net of withholding tax rate of 19%) per BBVA share, as a gross interim dividend against 2021 results. The dividend was paid on October 12, 2021.

On October 26, 2021, BBVA received the required authorization from the European Central Bank for the buyback of up to 10% of its share capital for a maximum sum of €3,500 million, in one or several tranches and over a maximum period of 12 months as from the communication by BBVA that the buyback of shares has effectively commenced (the "Authorization").

Once the Authorization has been obtained, and in exercise of the authority delegated to it by the Annual Shareholders' Meeting of BBVA held on March 16, 2018, the Board of Directors of BBVA, in its meeting held on October 28, 2021, agreed to carry out a program scheme for the buyback of own shares in accordance with the provisions of Regulation (EU) No. 596/2014 of the European Parliament and of the Council of April 16, 2014 on market abuse and Commission Delegated Regulation (EU) 2016/1052, of March 8, 2016, which will be executed in several tranches, for a maximum amount up to €3,500 million, aimed at reducing BBVA's share capital (the "Program Scheme"), notwithstanding the possibility to suspend or terminate the Program Scheme upon the occurrence of circumstances that makes it advisable.

Likewise, the Board of Directors agreed, within the scope of the Program Scheme, to carry out a first share buyback program which will be implemented externally through a lead-manager and will have a maximum amount of €1,500 million, a maximum number of shares to be acquired equal to 637,770,016 own shares, representing, approximately, 9.6% of the BBVA's share capital, and a maximum term of 5 months as from its effective start, that will take place after November 18, 2021.

5. Operating segment reporting

Operating segment reporting represents a basic tool for monitoring and managing the different activities of the BBVA Group. In preparing the information by operating segment, the starting point is the lowest-level units, which are aggregated in accordance with the organizational structure determined by the Group's Management to create higher-level units and, finally, the reportable operating segments themselves.

As of September 30, 2021, the structure of the information by operating segments reported by the BBVA Group differs from that presented at the end of the 2020 financial year, mainly as a consequence of the exclusion of the United States as an operating segment, as a result of the sale agreement reached with PNC (see Note 3).

The BBVA Group's operating segments and the agreements reached are summarized below:

- Spain

Includes mainly the banking and insurance business that the Group carries out in Spain, including the proportional share of results of the new company that emerged from the bancassurance agreement reached with Allianz at the end of 2020 (see Note 3).
- Mexico

Includes banking and insurance businesses in this country as well as the activity that BBVA Mexico carries out through its branch in Houston.
- Turkey

Reports the activity of Garanti BBVA group that is mainly carried out in this country and, to a lesser extent, in Romania and the Netherlands.
- South America

Mainly includes the banking and insurance activity carried out in the region. The information for this operating segment includes the results, activity, balance sheet and relevant management indicators for BBVA Paraguay for 2020; data which is not included for 2021 since the sale agreement was completed in January 2021 (see Note 3).
- Rest of business

Mainly incorporates the wholesale activity carried out in Europe (excluding Spain), and the United States with regard to the New York branch, as well as the institutional business that the Group develops in the United States through its broker-dealer BBVA Securities Inc. It also incorporates the banking business developed through the five BBVA branches located in Asia.

Corporate Center performs centralized Group functions, including: the costs of the head offices with a corporate function, management of structural exchange rate positions; portfolios whose management is not linked to customer relationships, such as financial and industrial holdings; stakes in Funds & Investment Vehicles in tech companies including the venture capital fund Propel Venture Partners; certain tax assets and liabilities; funds for employee commitments; goodwill and other intangible assets, as well as the financing of such portfolios and assets. Additionally, the results obtained by the Group's businesses in the United States until the sale to PNC on June 1, 2021 (see Note 19), are presented in a single line under the heading "Profit (loss) after tax from discontinued operations" in the condensed consolidated income statement. Finally, the costs related to the Banco Bilbao Vizcaya Argentaria, S.A. restructuring process in Spain, which is considered a strategic decision, are included in this aggregated area and are registered in the lines "Provisions", "Provisions or reversal of provisions", "Impairment or reversal of impairment on non-financial assets" and "Gains (losses) from non-current assets and disposal groups classified as held for sale not qualifying as discontinued operations" (see Notes 22, 37, 40 and 41).

The accompanying Interim Consolidated Management Report presents the condensed consolidated income statements under management criteria, as well as the main figures of the consolidated balance sheets by operating segments

6. Risk management

The principles and risk management policies, as well as tools and procedures established and implemented in the Group as of September 30, 2021 do not differ significantly from those included in Note 7 in the consolidated financial statements of the Group for the year ended December 31, 2020.

6.1. Risk associated with the COVID-19 pandemic

The COVID-19 (coronavirus) pandemic has adversely affected the world economy, and economic activity and conditions in the countries in which the Group operates, despite the gradual improvement experienced in 2021 driven by the increase in the rate of vaccination. The 2020 economic recession is expected to be followed by a relatively high activity growth in order to return to pre-crisis levels, but uneven across sectors and geographies. Among other challenges, these countries are still dealing with high unemployment levels, weak activity, supply disruptions and increasing inflationary pressures, while public debt has significantly increased due to the support and spending measures implemented by the authorities. Furthermore, there has been an increase in loan losses from both companies and individuals, which has so far been slowed down by the impact of government support measures, including bank payment deferrals, credit with public guarantee and direct aid measures. In addition, volatility in the financial markets may continue, affecting exchange rates and the value of assets and investments, all of which had adversely affected the Group's results in 2020. There are still uncertainties about its final impact in the future.

Additionally, the Group has been and may continue to be affected by the specific measures or recommendations adopted by authorities in the banking sector, such as variations in reference interest rates, the modification of prudential requirements, the temporary suspension of dividend payments, the modification of the deferral of monthly installments for certain loans and the granting of guarantees or public guarantees to new credit operations to companies and self-employed, the adoption of new similar measures or the termination of those already approved, as well as any changes in financial assets purchase programs by the ECB. Although as of September 30, 2021, the majority of the amounts of the payment deferrals granted due to the COVID-19 pandemic have already expired and, therefore, it has been possible to observe the payment behavior for many customers, there are still existing transactions that expire within the rest of the year 2021. Likewise, in Spain the maturity of grace periods of the Official Credit Institute (hereinafter "ICO") loans will take place in the course of 2022. Hence, as of September 30, 2021, it is not possible to anticipate completely the behavior of the existing operations because it cannot yet be assured that economic conditions will improve until their completion.

Since the outbreak of the COVID-19 pandemic, the Group has experienced declines in its activity. For instance, the granting of new loans to individuals has decreased since mobility restriction measures were approved in certain countries in which the Group operates. In addition, the Group faces various risks, such as a greater risk of volatility of the value of its assets (including financial instruments valued at fair value) and of the securities held for liquidity reasons, a possible increase in impaired loans and risk-weighted assets, as well as a negative impact on the Group's financing cost and its access to financing (especially in an environment where credit ratings are affected).

Furthermore, the pandemic could continue to adversely affect the business and transactions of third parties that provide critical services to the Group and, in particular, the higher demand and/or the lower availability of certain resources could, in some cases, make it more difficult for the Group to maintain the required service levels. In addition, the widespread use of remote work has increased the risks related to cybersecurity, as the use of non-corporate networks has increased.

In summary, the COVID-19 pandemic has had an adverse effect on the Group's results and capital base during 2020, although it has been mitigated along 2021, remains uncertainty about the ultimate effects

6.2. Credit risk

Credit risk arises from the probability that one party to a financial instrument will fail to meet its contractual obligations for reasons of insolvency or inability to pay and cause a financial loss for the other party. The general principles governing credit risk management in the BBVA Group, as well as the Credit risk management in the Group as of September 30, 2021 do not differ significantly from those included in Note 7 in the consolidated financial statements of the Group for the year ended December 31, 2020.

Payment deferrals

Since the beginning of the pandemic, the Group has offered payment deferral to its customers (retail, SMEs and wholesale) in all the geographies where it operates. These payment deferrals have been both legislative (based on national laws) and non-legislative (based on sectorial or individual schemes), aimed at mitigating the effects of COVID-19. Depending on the cases, the payment of principal and/or interest has been postponed, maintaining the original contract. Generally, these deferrals have been given for a period of less than one year. This measure has been extended to individuals and, in case of legal entities, to different sectors, being Leisure and Real Estate, the main users. The deadline to qualify for the payment deferrals has expired in most of the geographies except for Peru and Argentina that have extended the deadline.

Specifically, the Group's participation in the following payment deferrals or public guarantee measures by geography stands out:

- In Spain, payment deferral measures have been covered mainly by Royal Decree Law 8/2020 and 11/2020, as well as the sectorial agreement promoted by the Spanish Banking Association (hereinafter "AEB") to which BBVA has adhered.

The payment deferrals covered by the Royal Decree Law (hereinafter "RDL") have been proposed to the especially vulnerable groups indicated in the regulation. These measures consisted of payment deferral of three months of principal and interest. In addition, the possibility of customers joining sector agreements for the remaining term until the limit established has been offered, once such legal payment deferrals has expired. By type of customer, they are aimed at individuals, individual or self-employed entrepreneurs, and by type of product, mortgage, personal loans or consumer loans.

The payment deferrals granted under the sectorial agreement of the AEB are aimed at individuals for up to 12 months of capital deferral in the case of mortgage loans and up to 6 months in personal loans. Such sector agreement had been in force until September 29, 2020, but it was extended until March 31, 2021, although the new conditions only provided for the payment deferral of capital in mortgages up to 9 months, remaining 6 months on personal loans.

In addition, the Official Credit Institute has published several aid programs aimed at the self-employed, SMEs and companies, through which a guarantee of between 60% and 80% is granted for a period of up to 5 years to the new financing granted. The amount of the guarantee and its length depends on the size of the company and the type of aid. For financing operations realized before November 18, 2020 and supported by the government under RDL 8/2020 and RDL34/2020 there was the opportunity until May 15, 2021, to extend the deadline up to 3 years and up to a further 12 months of grace period regarding the initial deadlines and grace accorded.

Additionally, there are facilities in terms of deadline extensions (up to 10 years under requirements), change financing operations into participative loans as well as haircut in part of financing (RDL 5/2021 and Code of Good Practices).

The ICO has also subsidized individuals the amount of the rent up to 6 months in loans up to 6 years.

- In Mexico, the National Banking Commission of Securities ("CNBV") published official letters P285/2020 of March 26, 2020 and P293/2020 of April 15, 2020, allowing the granting of capital and interest payment deferral for a period 4 months extendable for 2 additional months. The deadline date of these measures was July 31, 2020. These measures were mainly used by individuals and companies, affecting mortgage loans, personal loans and consumer loans, including credit cards.
- In Turkey, in mid-March 2020 the government announced a program to stimulate the economy (Economic Stability Shield) allowing banks to defer payments for 3 months, with the possibility of extending up to 6 months, which was accompanied by several communications of the Banking Regulation and Supervisory Agency ("BRSA") in this regard. These supporting measures were granted to individual customers.

Likewise, public support programs have been recognized guaranteeing up to 80% of loans granted to companies for a period of 1 year.

- In Colombia, the binding legislation for payment deferral comes from the Financial Superintendency, specifically from its Circulars 07/2020 and 14/2020, as well as from Resolution No. 385. The payment deferral consisted in the deferral of payments of principal and interest until 6 months.
- In Peru, measures were approved through various official letters issued by the Superintendency of Banking and Insurance ("SBS"), allowing the deferral of principal and interest payments initially up to 6 months and then extended to 12, mainly to individuals, self-employed and small companies. The deadline date for the adoption of these measure was March 31, 2021.

Additionally, there have been public support programs such as "Reactiva", "Creceer" or "FAE" aimed at companies and micro companies with guaranteed amounts that, depending on the program and the type of company, are in a range of between 60% and 98%. In Apr 2021 "Reactiva" program allowed to extend the time of accepted operations. This extension may be requested until December 31, 2021 due to the extension of three additional months based on emergency Royal Decree N° 091-2021 of September 29, 2021.

- In Argentina, payment deferral measures are based on state legislation such as Royal Decree 544/2020 or Decree 319/202, as well as various Central Bank regulations. Aimed at a broad group of customers, they facilitate deferral of capital and interest for up to 3 months. The deadline date for the adoption of these measure was March 31, 2021.

There have been public support programs which offer guarantees up to 100% to micro-SMEs or self-employed and up to 25% to the rest of the companies in financing up to 1 year. In September 2021, the public support program was resumed until December 2021.

The amount of payment deferrals (existing and completed) under *European Banking Authority* (hereinafter "EBA") standards and the financing granted with public guarantees given at a Group level, as well as the number of customers of both measures, as of September 30, 2021 and December 31, 2020, are as follows:

Amount of payment deferrals and financing with public guarantees of the Group (Millions of Euros)

	Payment deferrals				Financing with public guarantees		Total payment deferrals and guarantees	(%) credit investment
	Existing	Completed	Total	Number of customers	Total	Number of customers		
September 2021	1,036	22,616	23,652	2,465,538	16,215	272,752	39,866	11.5 %

Other	136	216	19	13	—	—	154	229

The payment deferral measures for bank customers in the different countries in which the Group operates (such as those included in Royal Decree Law 11/2020, as well as in the AEB sectorial agreement to which BBVA has adhered in Spain) result in the temporary suspension, total or partial, of the contractual obligations with a deferral for a specific period of time.

Regarding the classification of exposures according to their credit risk, the Group has maintained a rigorous application of IFRS 9 when granting the payment deferrals and has reinforced the procedures for monitoring credit risk both throughout their validity and upon maturity. This means that the payment deferrals granting does not imply in itself an automatic trigger for a significant increase in risk and that the transactions subject to the payment deferrals are initially classified in the stage they had previously, unless, based on their risk profile, they should be classified in a worse stage. On the other hand, as evidence of payment has ceased to exist or has been reduced, the Group has introduced additional indicators or segmentations to identify the significant increase in credit risk that may have occurred in some transactions or a set of them and, where appropriate, they have been classified in stage 2 or stage 3.

Furthermore, the indications provided by the EBA have been taken into account to not consider forbearance the payment deferrals that meet a series of requirements and have been previously requested before March 31, 2021. All this without prejudice to maintaining its consideration as a forbearance if it was previously qualified as such or classifying the exposure in the corresponding stage previously stated.

On the other hand, the accounting treatment of singular transactions, that is to say, not covered by the general frameworks described, expired payment deferrals that have required additional support, and those requested as of March 31, 2021 is in accordance with the updated evaluation of the customer's credit quality and the characteristics of the solution granted.

Regarding public support for the loans' lending, it does not affect the evaluation of the significant increase in risk since it is valued through the credit quality of the borrower. However, in estimating the expected loss, the existence of the guarantor implies a possible reduction in the level of provisions necessary since, for the hedged part, the loss that would be incurred in the foreclosure of the

guarantee is taken into account. In case of extensions a new valuation of credit quality is made and if applicable accounting classification.

The public guarantees granted in the different geographies in which the Group operates have been considered as an integral part of the terms and conditions of the loans granted under the consideration that the guarantees are granted at the same time that the financing is granted to the client and in a way inseparable from it.

[Additional adjustments to expected losses measurement](#)

In addition to what is described on individualized and collective estimates of expected losses and macroeconomic estimates, the Group may supplement the expected losses if it deems it necessary to account for the effects that may not be included, either by considering risk drivers or by the incorporation of sectorial particularities or that may affect a set of operations or borrowers. These adjustments should be temporary, until the reasons that motivated them disappear or materialize.

For this reason, the expected losses have been supplemented with additional amounts that have been considered necessary to collect the particular characteristics of borrowers, sectors or portfolios and that may not be identified in the general process. In order to incorporate those effects that are not included in the impairment models, there are management adjustments to the expected losses which amount to €304 million as of September 30, 2021, €272 million in Spain and €32 million in Peru. As of December 31, 2021 there were €223 million in Spain. The variation in Spain and Peru is driven by additional provisions given the possibility of new extensions in the financing granted or agreements aimed at ensuring business viability.

Credit risk exposure

In accordance with IFRS 7 "Financial Instruments: Disclosures", the BBVA Group's credit risk exposure by headings in the balance sheets as of September 30, 2021 and December 31, 2020 is provided below. It does not consider the loss allowances and the availability of collateral or other credit enhancements to guarantee compliance with payment obligations. The details are broken down by the nature of the financial instruments and counterparties:

Maximum credit risk exposure (Millions of Euros)					
	Notes	September 2021	Stage 1	Stage 2	Stage 3
Financial assets held for trading		78,427			
Equity instruments	9	14,769			
Debt securities	9	25,521			
Loans and advances	9	38,137			
Non-trading financial assets mandatorily at fair value through profit or loss		5,874			
Equity instruments	10	4,994			
Debt securities	10	140			
Loans and advances	10	740			
Financial assets designated at fair value through profit or loss	11	1,137			
Derivatives (trading and hedging)		44,506			
Financial assets at fair value through other comprehensive income		70,028

Loan commitments given	28	132,584	124,104	8,214	265
Financial guarantees given	28	10,665	9,208	1,168	290
Other commitments given	28	36,190	32,414	3,300	477
Total maximum credit exposure		749,524			

The changes in the nine months ended September 30, 2021 and the year ended December 31, 2020 of impaired financial assets (financial assets and guarantees given) are as follows:

Changes in impaired financial assets and guarantees given (Millions of Euros)		
	September 2021	December 2020
Balance at the beginning	15,478	16,770
Additions	5,681	9,533
Decreases (*)	(3,318)	(5,024)
Net additions	2,363	4,509
Amounts written-off	(2,781)	(3,603)
Exchange differences and other	(172)	(968)
Discontinued operations	—	(1,230)
Balance at the end	14,888	15,478

(*) Reflects the total amount of impaired loans derecognized from the condensed consolidated balance sheet throughout the period as a result of mortgage recoveries and real estate assets received in lieu of payment as well as monetary recoveries.

Loss allowances

Below are the changes in the nine months ended September 30, 2021, and the year ended December 31, 2020 in the provisions recognized on the accompanying condensed consolidated balance sheets to cover the estimated loss allowances in loans and advances of financial assets at amortized cost:

Changes in loss allowances of loans and advances at amortized cost (Millions of Euros)		
	September 2021	December 2020
Balance at the beginning of the period	(12,141)	(12,427)
Increase in loss allowances charged to income	(7,301)	(9,274)
Stage 1	(1,311)	(1,699)
Stage 2	(1,337)	(2,169)
Stage 3	(4,654)	(5,407)
Decrease in loss allowances charged to income	5,116	4,381
Stage 1	1,146	1,485
Stage 2	1,004	1,077
Stage 3	2,966	1,818
Transfer to written-off loans, exchange differences and other	2,843	4,056
Transfer to discontinued operations	—	1,123
Closing balance	(11,484)	(12,141)

7. Fair value of financial instruments

The criteria and valuation methods used to calculate the fair value of financial assets as of September 30, 2021 do not differ significantly from those included in Note 8 from the consolidated financial statements for the year ended December 31, 2020.

The techniques and unobservable inputs used for the valuation of the financial instruments classified in the fair value hierarchy as Level 3, do not significantly differ from those detailed in Note 8 of the consolidated financial statements for the year ended December 31, 2020.

The effect on the consolidated income statements and on the consolidated equity, resulting from changing the main assumptions used in the valuation of Level 3 financial instruments for other reasonably possible assumptions, does not differ significantly from that detailed in Note 8 of the consolidated financial statements for the year ended December 31, 2020.

Below is a comparison of the carrying amount of the Group's financial instruments in the accompanying condensed consolidated balance sheets and their respective fair values as of September 30, 2021 and December 31, 2020:

Fair Value and Carrying Amount of Financial Instruments (Millions of Euros)					
		September 2021		December 2020	
	Notes	Carrying Amount	Fair Value	Carrying Amount	Fair Value
ASSETS					
Cash, cash balances at central banks and other demand deposits	8	63,232	63,232	65,520	65,520
Financial assets held for trading	9	109,078	109,078	108,257	108,257
Non-trading financial assets mandatorily at fair value through profit or loss	10	5,874	5,874	5,198	5,198
Financial assets designated at fair value through profit or loss	11	1,137	1,137	1,117	1,117
Financial assets at fair value through other comprehensive income	12	69,963	69,963	69,440	69,440
Financial assets at amortized cost	13	370,217	375,918	367,668	374,267
Derivatives – Hedge accounting		1,562	1,562	1,991	1,991
LIABILITIES					
Financial liabilities held for trading	9	83,359	83,359	86,488	86,488
Financial liabilities designated at fair value through profit or loss	11	9,726	9,726	10,050	10,050
Financial liabilities at amortized cost	20	481,662	483,838	490,606	491,006
Derivatives – Hedge accounting		2,666	2,666	2,318	2,318

The following table shows the financial instruments in the accompanying condensed consolidated balance sheets, broken down by the measurement technique used to determine their fair value as of September 30, 2021 and December 31, 2020:

Fair Value of financial Instruments by Levels (Millions of Euros)						
	September 2021			December 2020		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
ASSETS						
Cash, cash balances at central banks and other demand deposits	63,043	—	190	65,355	—	165
Financial assets held for trading	33,639	71,935	3,504	32,555	73,856	1,847
Derivatives	4,077	26,359	215	6,019	34,043	121
Equity instruments	14,728	—	40	11,367	31	60
Debt securities	13,695	11,608	218	12,790	11,123	57

Right to use assets	160	123
Accumulated depreciation	(59)	(42)
Impairment	(51)	(60)
Total	7,291	7,823

(*) In 2021, it includes allowances on right of use of the rented offices after the agreement with the union representatives on the collective layoff procedure proposed for Banco Bilbao Vizcaya Argentaria, S.A. in Spain (see Notes 22 and 39).

16. Intangible assets

Intangible assets (Millions of Euros)

	September 2021	December 2020
Goodwill	881	910
Other intangible assets	1,390	1,435
Computer software acquisition expense	1,210	1,202
Other intangible assets with an infinite useful life	11	12
Other intangible assets with a definite useful life	169	221
Total	2,271	2,345

Impairment Test

As mentioned in Note 2.2.7 of the consolidated financial statements for the year 2020, the cash-generating unit (hereinafter "CGUs") to which goodwill has been allocated are periodically tested for impairment by including the allocated goodwill in their carrying amount. This analysis is performed at least annually or whenever there is any indication of impairment. As of and for the nine months ended September 30, 2021, no indicators of impairment have been identified in any of the main CGUs.

17. Tax assets and liabilities

Tax assets and liabilities (Millions of Euros)

	September 2021	December 2020
Tax assets		
Current tax assets	1,499	1,199
Deferred tax assets	14,429	15,327

19. Non-current assets and disposal groups classified as held for sale and liabilities included in disposal groups classified as held for sale

Non-current assets and disposal groups classified as held for sale and liabilities included in disposal groups classified as held for sale. Breakdown by items (Millions of Euros)

	September 2021	December 2020
ASSETS		
Foreclosures and recoveries	1,260	1,398
Other assets from tangible assets (*)	607	480
Companies held for sale (**)	553	84,792
Accrued amortization (***)	(114)	(89)
Impairment losses (*)	(644)	(594)
Total	1,662	85,987
LIABILITIES		
Companies held for sale (**)	—	75,446
Total	—	75,446

(*) In 2021, it includes the reclassification of owned offices and facilities from "tangible assets" to "non-current assets and disposal groups classified as held for sale" and the adjustments due to the closure of the owned offices and the decommissioning of facilities after the agreement with the union representatives on the collective layoff procedure proposed for Banco Bilbao Vizcaya Argentaria, S.A. in Spain (see Notes 22 and 40).

(**) It includes BBVA's stake in Divarian, S.A. in 2021. It includes mainly BBVA's stake in BBVA USA in 2020 (see Note 3).

(***) Accumulated amortization until related asset was reclassified as "Non-current assets and disposal groups classified as held for sale".

Assets and liabilities from discontinued operations

As mentioned in Note 1.3 and 3, the agreement for the sale of the BBVA subsidiary in the United States was announced in 2020 and finally completed on June 1, 2021. The assets and liabilities corresponding to the 37 companies sold were reclassified to the headings "Non-current assets and disposal groups classified as held for sale" and "Liabilities included in disposal groups classified as held for sale" of the consolidated balance sheet as of December 31, 2020; and the earnings of these companies for the first five months of 2021 and the nine months ended September 30, 2020 were classified under the heading "Profit (loss) after tax from discontinued operations" of the accompanying condensed consolidated income statements (see Note 1.3).

The condensed consolidated balance sheets as of September 30, 2021 and December 31, 2020, and the condensed consolidated income statements and the condensed consolidated statements of cash flows for the first five months of 2021 and for the nine months ended September 30, 2020, of the companies sold in the United States are provided below:

Condensed consolidated balance sheets of the companies sold in the United States subsidiary as of September 30, 2021 and December 31, 2020

Total net assets/liabilities	(9,378)

EFFECT ON NET CASH INFLOWS FROM DISCONTINUED OPERATIONS - USA (Millions of Euros)

	June 2021
Consideration received satisfied in cash	9,512
Cash and cash equivalents disposed of	(11,476)
Total net cash inflows from discontinued operations - USA	(1,964)

EFFECT OF THE DIVESTMENT OF THE MOST SIGNIFICANT SALES OF NON-CURRENT ASSETS FOR SALE OF THE BBVA GROUP REFLECTED IN THE CONDENSED CONSOLIDATED STATEMENT OF CASH FLOWS (Millions of Euros)

	September 2021
Consideration received satisfied in cash - USA	9,512
Consideration received satisfied in cash - Paraguay	210
Other collections from non-current assets and liabilities for sale	136
Total cash received from non-current assets and liabilities for sale	9,858

20. Financial liabilities at amortized cost

20.1 Breakdown of the balance

Financial liabilities measured at amortized cost (Millions of Euros)			
	Note	September 2021	December 2020
Deposits		412,335	415,467
Deposits from central banks		50,501	45,177
<i>Demand deposits</i>		610	163
<i>Time deposits and other</i>		42,512	38,274
<i>Repurchase agreements</i>		7,378	6,740
Deposits from credit institutions		21,006	27,629
<i>Demand deposits (*)</i>		8,935	7,196
<i>Time deposits and other (*)</i>		8,407	16,079
<i>Repurchase agreements</i>		3,664	4,354
Customer deposits		340,828	342,661
<i>Demand deposits (*)</i>		276,129	266,250
<i>Time deposits and other (*)</i>		63,522	75,666
<i>Repurchase agreements</i>		1,177	746
Debt certificates		55,397	61,780
Other financial liabilities		13,930	13,358
Total	7	481,662	490,606

(*) The variation is mainly due to the decrease in time deposits at Banco Bilbao Vizcaya Argentaria, S.A. offset by the increase in demand deposits (and investment funds) due to the current interest rate situation.

The amount recorded in "Deposits from central banks - Time deposits" includes the provisions of the TLTRO III facilities of the European Central Bank, mainly BBVA S.A. amounting to €38,692 and €35,032 million as of September 30, 2021 and December 31, 2020, respectively.

The positive income currently being generated by the drawdowns of the TLTRO III facilities is recorded under the heading of "Interest income and other similar income – other income" in the condensed consolidated income statements and amounts to €284 million and €122 million for the nine months ended September 30, 2021 and 2020 respectively (see Note 29.1).

20.2 Debt certificates

Debt certificates (Millions of Euros)

	September 2021	December 2020
In Euros	35,529	42,462
Promissory bills and notes	222	860
Non-convertible bonds and debentures	15,158	14,538
Covered bonds (*)	9,923	13,274
Hybrid financial instruments (**)	367	355
Securitization bonds	2,393	2,538
Wholesale funding	244	2,331
Subordinated liabilities	7,222	8,566
Convertible perpetual certificates	3,500	4,500
Non-convertible preferred stock	—	159
Other non-convertible subordinated liabilities	3,722	3,907
In foreign currencies	19,868	19,318
Promissory bills and notes	852	1,024
Non-convertible bonds and debentures	7,910	8,691
Covered bonds (*)	213	217
Hybrid financial instruments (**)	2,207	455
Securitization bonds	3	4
Wholesale funding	1,219	1,016
Subordinated liabilities	7,464	7,911
Convertible perpetual certificates	1,732	1,633
Non-convertible preferred stock	—	35
Other non-convertible subordinated liabilities	5,731	6,243
Total	55,397	61,780

(*) Including mortgage-covered bonds. In the nine months ended September 30, 2021 there were several maturities of mortgage-covered bonds.

(**) Corresponds to structured note issuance whose underlying risk is different from the underlying risk of the derivative.

Most of the foreign currency issues are denominated in U.S. dollars.

20.3 Other financial liabilities

Other financial liabilities (Millions of Euros)

	September 2021	December 2020
Lease liabilities	2,529	2,674
Creditors for other financial liabilities	3,269	2,408
Collection accounts	2,649	3,276
Creditors for other payment obligations	5,484	5,000
Total	13,930	13,358

21. Assets and liabilities under insurance and reinsurance contracts

As of September 30, 2021 and December 31, 2020, the balance under the heading "Assets under reinsurance and insurance contracts" in the accompanying condensed consolidated balance sheets amounted to €278 million and €306 million, respectively.

Technical reserves (Millions of Euros)

	September 2021	December 2020
Mathematical reserves	9,211	8,731
Provision for unpaid claims reported	712	672
Provisions for unexpired risks and other provisions	641	548
Total	10,564	9,951

22. Provisions

Provisions. Breakdown by concepts (Millions of Euros)

	September 2021	December 2020
Provisions for pensions and similar obligations	3,714	4,272
Other long term employee benefits	43	49
Provisions for taxes and other legal contingencies	604	612
Provisions for contingent risks and commitments	727	728
Other provisions (*)	1,164	479
Total	6,251	6,141

(*) Individually insignificant provisions or contingencies for various concepts in different geographies. In 2021, it also includes a €754 million provision for the collective layoff procedure that has been carried out at Banco Bilbao Vizcaya Argentaria, S.A in the second quarter of 2021.

Collective layoff procedure

On June 8, 2021, BBVA reached an agreement with the union representatives on the collective layoff procedure proposed for Banco Bilbao Vizcaya Argentaria, S.A. in Spain on April 13, 2021, which would affect 2,935 employees. The agreement also included the closing of 480 offices. The cost of the process includes €994 million before taxes, of which €754 million correspond to the collective layoff and €240 million to the closing of offices (see Notes 15, 19, 37, 40 and 41).

23. Pension and other post-employment commitments

The Group sponsors defined-contribution plans for the majority of its active employees, with the plans in Spain and Mexico being the most significant. Most of the defined benefit plans are for individuals already retired, and are closed to new employees, the most significant being those in Spain, Mexico and Turkey. In Mexico, the Group provides post-retirement medical benefits to a closed group of employees and their family members, both in active service and retirements.

The amounts relating to post-employment benefits charged to the condensed consolidated income statement are as follows:

Condensed consolidated income statement impact (Millions of Euros)

	Notes	September 2021	September 2020
Interest income and expense		29	33
Personnel expense		92	92
<i>Defined contribution plan expense</i>	35.1	56	58
<i>Defined benefit plan expense</i>	35.1	35	34
Provisions, net	37	91	185
Total expense (income)		212	310

24. Capital

As of September 30, 2021 and December 31, 2020, BBVA's share capital amounted to €3,267,264,424.20 divided into 6,667,886,580 fully subscribed and paid-up registered shares, all of the same class and series, at €0.49 par value each, represented through book-entry accounts. All of the Bank's shares carry the same voting and dividend rights, and no single stockholder enjoys special voting rights. Each and every share is part of the Bank's capital.

25. Retained earnings and other reserves

Retained earnings and other reserves (Millions of Euros)		
	September 2021	December 2020
Retained earnings	31,246	30,508
Other reserves	(245)	(164)
Total	31,001	30,344

26. Accumulated other comprehensive income

General note: the results generated by BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021, are presented in a single line as "Profit/(loss) after tax from discontinued operations".

(1) Excluding the assets and liabilities figures from BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021, classified as non-current assets and liabilities held for sale (NCA&L) as of 31-12-20. The figures related to "Loans and advances to customers (gross)", "Deposits from customers" and "Total customer funds", including BBVA USA, would stand at €379,018m, €395,132m and €495,171m, respectively, as of 30-09-20.

(2) Non-recurring impacts include: (I) profit/(loss) after tax from discontinued operations as of 30-09-21, 31-12-20 and 30-09-20; (II) the net costs related to the restructuring process as of 30-09-21; and (III) the net capital gain from the bancassurance operation with Allianz as of 31-12-20.

(3) Adjusted by additional Tier 1 instrument remuneration.

(4) Calculated by dividing shareholder remuneration over the last twelve months by the closing price of the period.

(5) Excluding BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021.

(6) Phased-in ratios include the temporary treatment on the impact of IFRS 9, calculated in accordance with Article 473 bis amendments of the Capital Requirements Regulation (CRR), introduced by the Regulation (EU) 2020/873.

(7) Excluding BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021 and BBVA Paraguay.

Highlights

Results and business activity

The BBVA Group generated a **net attributable profit, excluding non-recurring impacts**, of €3,727m between January and September 2021, representing a year-on-year increase of +84.9%.

Including the non-recurring impacts —namely the €+280m corresponding to the profit generated by BBVA USA and the rest of Group's companies included in the sale agreement to PNC until the closing date of the operation on June 1, 2021 and the €-696m of net costs related to the restructuring process— the Group's **net attributable profit** amounts to €3,311m, which compares very positively with the €-15m in the same period of the previous year, which was severely affected by the effects of the COVID-19 pandemic.

In year-on-year terms and at constant exchange rates, it is worth highlighting the good performance of the gross income and especially of the recurring income, i.e. the sum of net interest income and fees, which grew by 6.1%, and the positive evolution (+13.7%) of net trading income (hereinafter NTI) mainly due to the good performance of the Global Markets unit in Spain and the revaluations of the Group stakes in Funds & Investment Vehicles in tech companies and the industrial and financial portfolio.

Operating expenses increased (+6.5% year-on-year) in all areas except Spain and Rest of Business. This growth is framed within an environment of activity recovery and high inflation, particularly in Mexico and Turkey.

Lastly, the lower provisions for impairment on financial assets stand out (-46.2% in year-on-year terms and at constant exchange rates), mainly due to the strong impact of provisions for COVID-19 in 2020.

Loans and advances to customers (gross) recorded an increase of 1.5% compared to the end of December 2020, strongly supported by the performance of individuals (+2.5%), with growth in almost all geographical areas, except Rest of Business, highlighting the increase of consumer loans and credit cards in Turkey, Spain and Mexico. Loans to business also increased slightly (+0.6% in the year), thanks to the positive evolution in Mexico and Spain.

Customer funds showed an increase of 1.5% compared to the end of December 2020, due to the favorable performance of demand deposits and off-balance sheet funds in all geographical areas (highlighting mutual funds in Spain and Mexico), which manage to offset the decline in time deposits (-16.5%) thanks to the lower balances recorded in Spain and, to a lesser extent, in Rest of Business.

LOANS AND ADVANCES TO CUSTOMERS (GROSS) AND TOTAL CUSTOMER FUNDS (YEAR-TO-DATE CHANGE)

Business areas

As for the business areas, in all of them, the provisions for impairment on financial assets decreased compared to 2020 due to the outbreak of the pandemic. In addition, in each of them it is worth mentioning:

- **Spain:** BBVA in Spain achieved a net attributable profit of €1,223m between January and September 2021, +160.9% of the profit achieved in the same period of the previous year, mainly due to the increase in incurring income (thanks to the favorable evolution of fees) and in NTI and the reduction of operating expenses in 2021.
- **Mexico:** BBVA in Mexico generated a net attributable profit of €1,811m between January and September 2021, representing an increase of 47.4% compared to the same period of the previous year, at constant exchange rate. This evolution is driven by a 5.9% growth (at constant exchange rate) in recurring income and by the strength of the net margin (+1.4%).
- **Turkey:** The net attributable profit generated by Turkey between January and September 2021 stood at €583m, 48.4% (at constant exchange rate) above the figure achieved in the same period of the previous year, mainly due to the growth of net fees and commissions and NTI.
- **South America:** South America generated a cumulative net attributable profit of €339m between January and September 2021, which at constant exchange rates and excluding BBVA Paraguay in 2020, represents a year-on-year variation of +35.6%, mainly due to a better evolution of recurring income and NTI between January and September 2021 (+18.8%), partially offset by a higher inflation adjustment in Argentina in 2021.

- **Rest of Business:** At the end of September 2021, the net attributable profit for the area stood at €205m (+32.1% year-on-year, at constant exchange rates). It is worth mentioning that this area mainly incorporates the wholesale business developed in Europe (excluding Spain) and in the United States, as well as the banking business developed through the 5 BBVA branches in Asia.

Corporate Center: The net attributable loss of the Corporate Center, including the aforementioned non-recurring impacts, at the close of September 2021 was €-849m, well below (-68.2%) the net attributable loss for the same period of the previous year, €-2,675m. In 2021, this result includes several non-recurring impacts: 1) the net attributable profit amounting to €280m generated by the Group's businesses in the United States included in the sale agreement and 2) the net cost related to the restructuring process amounting to €-696m. Excluding these non-recurring impacts, the net attributable loss stood at €-433m (compared to the cumulative loss of €-644m at the end of September 2020).

Lastly and to allow a broader understanding of the Group's activity and results, supplementary information is provided in the following for the wholesale business carried out by BBVA, **Corporate & Investment Banking (CIB)**, in the countries where it operates. The wholesale business area generated a net attributable profit of €955m between January and September 2021, which represents a 42.1% increase in year-on-year terms, thanks to the growth in the recurring income and the NTI and lower provisions for impairment on financial assets, which increased significantly in 2020 due to the outbreak of the COVID-19 pandemic.

NET ATTRIBUTABLE PROFIT (MILLIONS OF EUROS)

General note: (I) Excludes: BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021, as of Jan.-Sep.20 and Jan.-Sep.21 and (II) the net cost related to the restructuring process as of Jan.-Sep.21.
(1) At constant exchange rates.

NET ATTRIBUTABLE PROFIT BREAKDOWN⁽¹⁾ (PERCENTAGE. JAN.-SEP. 2021)

(1) Excludes the Corporate Center.

Solvency

The CET1 Fully-loaded ratio stood at 14.48% as of September 30, 2021, which means a **strong capital generation** in the quarter (31 basis points) and a **large capital buffer**, widely covering the capital requirements of the BBVA Group even after the share buyback. For more information on the Group's share buyback program, please see "Other highlights" at the end of the current "Highlights" section.

Strategy developments

BBVA's strategy has been reinforced in 2021 as a result of the acceleration of some of the trends, such as digitization or the commitment to more sustainable and inclusive development. The anticipation of these trends in the Group strategy has allowed BBVA to progress in the execution of its **six strategic priorities**.

Between January and September 2021, BBVA has continued to **help its clients improve their financial health** by focusing on the development of new tools and functionalities.

In this regard, BBVA's mobile banking app continues to lead the digital experience in Europe for the fifth consecutive year, according to the recent report "The Forrester Digital Experience Review™: European Mobile Banking Apps, Q3 2021". BBVA has stood out especially for the experience it offers in financial health, which helps clients improve their financial well-being through tailored suggestions. This functionality also offers useful content that guides clients in managing their day-to-day finances with a clear and intuitive design.

Advice that is appreciated by BBVA clients, which is reflected in a better Net Promoter Score among users of the financial health tools in Spain in the last quarter, which is 39% higher than that of other customers. Likewise, these financial advisory tools have been a key element for the contracting of products. Thus, in Spain, in the first nine months of the year they have contributed 17% of all investment fund contracts, and 25% of mortgage contracts.

BBVA, an overall digital experience leader five years in a row, according to "European Mobile Banking Apps, Q3 2021"

FORRESTER
The Forrester Digital Experience Review™: European Mobile Banking Apps, Q3 2021

Furthermore, the Group has reaffirmed its commitment to sustainability in 2021 with a focus on combating climate change and inclusive growth. BBVA wants to **help its clients in the transition towards a sustainable future** not only with financing but also with advice and innovative sustainable solutions.

In terms of financing, BBVA has originated a total of €75,355m in sustainable financing between 2018 and September 2021. This type of financing has grown by 69% in the first nine months of 2021 compared to the same period of the previous year. A good example of

the operations included in this type of financing is the €833m stake in a recent issuance of green debt from the Kingdom of Spain. The funds will be used to finance projects that promote ecological transition and adaptation to and mitigation of the impact of climate change.

BBVA aims to provide a comprehensive support service to its customers, individuals and companies, including also advisory so that they can take advantage of investment opportunities in sustainability and future technologies, and be more efficient and competitive. Thus, the Group continues being a pioneer in the development of innovative sustainable solutions. A good example is the recent launch in Spain of a tool for calculating the carbon footprint for retail customers, already developed for companies in 2020. This tool measures CO₂ emissions into the atmosphere, based on data collected from invoices and card payments in selected shops, and offers a series of tailored tips on how to reduce them. The global nature of this new development allows it to be implemented in other geographical areas.

But beyond the origination of sustainable financing, in terms of managing the impact of the activity and integrating the risk of sustainability into the Bank's processes, in the first nine months of 2021, BBVA has announced very relevant milestones such as the commitment to channel €200 billion to sustainable financing between 2018 and 2025, twice the amount established in the initial target; the decision to stop financing companies with coal-related activities; or the Net Zero 2050 commitment, which implies zero net CO₂ emissions in that year, taking into account both the direct emissions of the Bank (where it has been neutral since 2020) and indirect emissions, i.e. those of the customers it finances. In this regard, BBVA is advancing in setting 2030 decarbonization goals in CO₂ intensive selected industries, which will be announced in the context of the COP26.

In addition, a new global Sustainability area has been created, which aims to position BBVA as the benchmark bank for customers in sustainability solutions. The new global area will design the strategic sustainability agenda, define and promote the lines of work in this area of the different global and transformation units (Risk, Finance, Talent and Culture, Data, Engineering, among others) and develop new sustainable products. In addition, this area will be in charge of developing specialized knowledge for differential clients advice.

Regarding the focus on inclusive growth, BBVA and its foundations have recently announced their Community Commitment 2025, a plan through which they will allocate €550m to social initiatives, supporting inclusive growth in the countries where they operate. This commitment aims to address the most important social challenges in each region and complements the previously announced commitment to channel sustainable financing in the period 2018-2025 amounting to €200 billion.

This commitment has three lines of action: reducing inequality and promoting entrepreneurship, providing opportunities for all through education and supporting research and culture.

Through various initiatives, BBVA will support 5 million entrepreneurs, help more than 3 million people have a quality education and train 1 million people in financial education. In addition, the BBVA Microfinance Foundation will provide more than €7 billion in microcredits. In total, these programs will reach 100 million people during the mentioned period.

For all the reasons mentioned above, BBVA is the most sustainable European bank, according to the Dow Jones Sustainability Index, and the second in the world. An acknowledgement shared by Euromoney, which has named BBVA the best bank in corporate social responsibility in Western Europe in 2021, recognizing BBVA's commitment to improve social, economic and environmental conditions in the region.

On the other hand, BBVA seeks to accelerate its **growth**, positioning itself where its **customers** are, which requires a greater presence in digital channels, both own and third parties. BBVA considers that it is a great time to grow profitably and invest in value segments as well as other growth paths such as the entry into new markets, agreements with third parties or the digital acquisition of new customers. In this sense, the Group has recently announced the launch of a purely digital retail offer in Italy, with differential proposed value and customer experience. Besides, BBVA continues focusing on the acquisition of retail customers through its own digital channels, which, based on data as of the end of September 2021, has increased by 48% in the last twelve months, reaching

37% of new customers in the period. This has also been reflected in digital sales which, in cumulative terms and at the end of September, already represented 55% of the Group's total sales in PRV¹.

BBVA continues to make progress towards **operational excellence**. The Group aims to offer an excellent customer experience at an efficient cost through a relationship model leveraging digitalization. In this sense, 68% of the bank's active customers already use digital channels and 64% use mobile channels. Thanks to this, BBVA stands out in terms of efficiency with a ratio of 44.7% compared to the average of its European peers.

The Group places **the best and most committed team** at the center of its strategic priorities. For this reason, BBVA is one of the 30 companies worldwide awarded with the recognition "Exceptional Workplace 2021" by the American consulting firm Gallup. This award distinguishes organizations committed to developing the human potential of their staff.

Likewise, the Group's commitment to inclusion and diversity and the initiatives developed in this regard has led BBVA to be included for the fourth consecutive year in the Bloomberg Gender-Equality Index, a ranking that includes the 100 global companies with the best practices in gender diversity. BBVA is also a signee of the Charter of Diversity at the European level and the Women's Empowerment Principles of the United Nations.

For all this, the Group considers **data and technology** as the main catalysts for innovation. Data has become a key differential factor and data management creates strong competitive advantages. An example of BBVA's firm commitment to becoming a data-driven organization is the progress in the development of an integrated big data platform, in which more than 1,600 data scientists, developers and specialists are involved. BBVA is also committed to the increasing use of new technologies such as the cloud, blockchain or artificial intelligence.

Other highlights

- On January 29, 2021, BBVA announced its intention to return in 2021 to its shareholder remuneration policy consisting in the distribution of an annual payout of between 35% and 40% of the profits obtained in each financial year, fully paid in cash, in two different payments (expected to take place in October and April and subject to the applicable authorizations), provided that recommendation ECB/2020/62 is revoked and there are no further restrictions or limitations. On July 23, 2021, the European Central Bank made public the approval of recommendation ECB/2021/31 replacing recommendation ECB/2020/62 and to be in force as of September 30, 2021, removing the restrictions on dividends and buyback programs contained in that recommendation. Accordingly, on September 30, 2021 BBVA announced that BBVA's Board of Directors approved the payment in cash of €0.08 per BBVA share, as a gross interim **dividend against 2021 results**, which was paid on October 12, 2021.
- On 26 October 2021, BBVA received the required authorization from the ECB for the buyback of up to 10% of its share capital for a maximum sum of €3,500m, in one or several tranches and over a maximum period of 12 months as from the communication by BBVA that the **buyback of shares** has effectively commenced (the "Authorization").

Once the Authorization has been obtained the Board of Directors of BBVA, in its meeting held on 28 October 2021, agreed to carry out a program scheme for the buyback of own shares which will be executed in several tranches, for a maximum amount up to €3,500m, aimed at reducing BBVA's share capital (the "Program Scheme"), notwithstanding the possibility to suspend or terminate the Program Scheme upon the occurrence of circumstances that makes it advisable.

Likewise, the Board of Directors agreed to carry out a first share buyback program which will have a maximum amount of €1,500m, a maximum number of shares to be acquired equal to 637,770,016 own shares, representing, approximately, 9.6% of the BBVA's share capital, and a maximum term of 5 months as from its effective start, that will take place after 18 November 2021.

- In June 2021, BBVA and the majority of the labor union representatives reached an agreement on the restructuring plan of BBVA S.A. in Spain, which includes redundancies of 2,935 employees in total (divided into 2,725 layoffs and 210 leaves of absence, about 10% of the Group's total workforce in Spain) and an outplacement program for all interested employees. The agreement also includes the closing of 480 branches. The process has been characterized by an attitude of dialogue between the parties and it has been carried out with a clear interest in voluntary acceptance. As of September 30, 2021, a total of 1,674 employees have already signed the exit of BBVA S.A. (some of them did not effectively leave the Bank until October 1, 2021) and 260 branches have been closed. Additional employee departures from the branches are expected to occur during October and November, the volume of which will depend on the branches closures during both months, although the departure of some workers could be extended until March 31, 2022 for organizational reasons.

For management information purposes, as it is considered a strategic decision, the impacts of the process have been assigned to the Corporate Center. This process will generate estimated savings of approximately €250m per year, before taxes, from 2022 onwards, of which approximately €220m would correspond to personnel expenses. In 2021 the estimated savings will be approximately €65m before taxes, most of which will materialize in the last quarter of 2021, with the departure of employees starting July 18, 2021.

¹ Product Relative Value is a proxy used for the economic representation of the sale of units.

Macro trends

In the third quarter of 2021, the global economy has continued to recover from the crisis caused by the COVID-19 pandemic, mainly thanks to progress in vaccine rollout against COVID-19 and the significant economic stimuli adopted by public authorities. Activity indicators show, however, that the economic recovery process has lost momentum in recent months, especially in countries such as the United States and China.

Furthermore, upward pressure on prices has recently increased more than expected. Consumer inflation remains at unusually high levels, well above average levels in 2010 and 2019. In September, annual inflation stood at 5.4% in the United States and 3.4% in the Eurozone.

Both the recent slowdown in growth and inflation rise in recent months are partly due to a series of problems in global supply chains, caused, among other factors, by the relative strength of demand versus supply, after the rapid reopening of the economy which was possible thanks to the drop of COVID-19 infections. Meanwhile, commodity prices have risen sharply in recent months, especially energy prices, reinforcing upward pressures on prices and downward pressures on economic activity.

In this context, the United States Federal Reserve is preparing to start the process of withdrawing monetary stimuli. Specifically, the rollback in its bond-buying program is probably to begin in the last quarter of 2021 and, in terms of monetary policy, it is likely that interest rates will be gradually adjusted upward starting the end of 2022. In any case, the approach of economic policy in the major regions is expected to settle in the coming quarters.

According to BBVA Research estimates, the recovery process of the global economy is expected to continue in the coming months, although at a slightly slower pace than expected three months ago and global GDP will expand around 6.1% in 2021. Also according to BBVA Research forecasts, growth will reach 5.9% in 2021 in the United States, 8% in China and 5.2% in the Eurozone. Furthermore, inflationary pressures are expected to remain relatively high, though they will most likely moderate next year as problems in global supply chains remedied.

Group

Quarterly evolution of results

The BBVA Group's results in the **third quarter** of 2021 stood at €1,400m, with a favorable performance compared to the previous quarter (+94.9% at constant exchange rate), highlighting the following trends:

- Increase in recurring revenues in Turkey, Mexico and South America.
- Decrease in NTI (-23.6% at constant exchange rate), due to lower results of the Global Markets unit and also affected by seasonality in certain geographical areas.
- Favorable evolution of the other operating income and expenses line, due to the contribution made to the SRF by Spain in the second quarter of 2021. In addition, the comparison is affected by the lower dividend income recorded at the Corporate Center, as the previous quarters included, among others, the dividend of Telefónica and those from the Group's investments in Funds & Investment Vehicles in tech companies.
- Increase in operating expenses in Mexico and South America, in an environment of inflation and recovery of activity.

General note: the results generated by BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021, are presented in a single line as "Profit/(loss) after tax from discontinued operations".

(1) Profit/(loss) after tax from discontinued operations includes the goodwill impairment in the United States registered in the first quarter of 2020 for an amount of €2,084m.

(2) Net capital gains from the sale to Allianz of the half plus one share of the company created to jointly develop the non-life insurance business in Spain, excluding the health insurance line.

(3) Adjusted by additional Tier 1 instrument remuneration.

Year-on-year evolution of results

The BBVA Group generated a **net attributable profit, excluding non-recurring impacts**, of €3,727m between January and September 2021, representing a year-on-year increase of +84.9%. Including these impacts —namely €+280m from the results of discontinued operations and €-696m from the net costs related to the restructuring process— the Group's **net attributable profit** amounts to €3,311m, which compares very positively with the €-15m in the same period of the previous year, which was severely affected by the effects of the COVID-19 pandemic. With regard to the recording of these restructuring costs, it should be noted that, solely for management purposes and for the purpose of the comments provided in this report, these are included in the income statement line "Net cost related to the restructuring process". The financial information is presented to the Group's Senior Management using this approach. This report includes a reconciliation between the management approach and the BBVA Group's Condensed Interim Consolidated Financial Statements.

Despite the complex environment and at constant exchange rates, good performance in recurring income, i.e. net interest income (which accelerated its year-on-year growth rate) and fees, the positive evolution of net trading income (NTI) and lower provisions for impairment on financial assets.

Earning per share (euros) ⁽²⁾	0.46			(0.05)

General note: the results generated by BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021, are presented in a single line as "Profit/(loss) after tax from discontinued operations".

(1) Profit/(loss) after tax from discontinued operations includes the goodwill impairment in the United States registered in the first quarter of 2020 for an amount of €2,084m.

(2) Adjusted by additional Tier 1 instrument remuneration.

Unless expressly indicated otherwise, to better understand the changes under the main headings of the Group's income statement, the year-on-year rates of change provided below refer to **constant exchange rates**. When comparing two dates or periods in this report, the impact of exchange rate variations against the euro for the currencies of the countries in which BBVA operates is sometimes excluded, assuming that the exchange rates remain constant. In doing so, with regard to income statement amounts, average exchange rates of the most recent period are used for each currency in the geographic areas where the Group operates for both periods.

Net interest income as of September 30, 2021 was higher than in the same period of the previous year (+2.5%), due to the good performance in South America and Mexico, which offset the poor evolution in Turkey, Spain and Rest of Business.

All areas, with the exception of Rest of Business, showed a positive performance in the **net fees and commissions** line compared to the accumulated balance between January and September 2020 (+19.2% in the Group), which is partly explained by lower activity and the removal of certain fees as a measure to support customers during the worst moments of the pandemic in 2020, as well as higher fees from payment systems, deposits and asset management in 2021.

NET INTEREST INCOME/ATAS⁽¹⁾ (PERCENTAGE)

(1) Excluding BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021.

NET INTEREST INCOME PLUS NET FEES AND COMMISSIONS (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

At current exchange rates
(1) At current exchange rates: +0.2%

NTI showed a year-on-year increase of +13.7% as of September 30, 2021, mainly due to the good performance of the Global Markets unit in Spain and the revaluations of the Group stakes in Funds & Investment Vehicles in tech companies and the industrial and financial portfolio.

The **other operating income and expenses** line accumulated a negative result of €-108m as of September 30, 2021, compared to €+53m in the same period last year, due to BBVA's greater annual contribution in Spain to the Single Resolution Fund (hereinafter SRF), the higher negative adjustment for inflation in Argentina and the lower contribution of the insurance business.

GROSS INCOME (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

At current exchange rates
(1) At current exchange rates: -0.2%

Operating expenses increased (+6.5% year-on-year) in all areas except Spain and Rest of Business. This growth is framed within an environment of activity recovery and high inflation, particularly in Mexico and Turkey.

The **efficiency** ratio stood at 44.7% as of September 30, 2021, in line with the ratio achieved in the same period of the previous year (44.4%), with an improvement of 83 basis points over the ratio at the end of December 2020.

OPERATING EXPENSES (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

EFFICIENCY RATIO (PERCENTAGE)

Impairment on financial assets not measured at fair value through profit or loss (**impairment on financial assets**) closed September, 2021 with a negative balance of €2,202m, significantly lower than the previous year (-46.2%) and with a decrease in all geographical areas mainly due to the negative impact of provisions for COVID-19 in 2020.

OPERATING INCOME (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

IMPAIRMENT ON FINANCIAL ASSETS (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

The **provisions or reversal of provisions** line (hereinafter "provisions") closed with a negative balance of €-224m as of September 30, 2021, -61.6% below the figure accumulated in the same period last year, mainly due to provisions to meet potential claims in Spain and to increased provisions for special funds and contingent risk and commitments in Turkey, in both cases registered in 2020.

With regard to **other gains (losses)** line, it closed September 2021 with a negative balance of €5m, an improvement on the figure reached the previous year (€-259m), mainly due to the impairment of investments in subsidiaries, joint ventures and associates in 2020 registered at the Corporate Center.

As a result of the above, the BBVA Group generated a **net attributable profit, excluding non-recurring impacts**, of €3,727m between January and September 2021, representing a year-on-year increase of +99.3%. These non-recurring impacts include:

- The results generated by BBVA USA and other companies included in the sale agreement to PNC and classified as **discontinued operations**, generated €280m in 2021 until the closing of the operation, contrasting very positively with the negative result of €-2,031m accumulated between January and September 2020, which included the impact of the goodwill impairment in the United States. These results are recorded in the "Profit/(loss) after tax from discontinued operations" line of the Corporate Center's income statement.
- The **net cost related to the restructuring process** of BBVA S.A. in Spain which amounted to €-696m, of which, before tax, €-754m correspond to the collective layoff and €-240m to branches closures.

Taking into account both impacts, the Group's **net attributable profit** between January and September 2021 amounts to €3,311m, which compares very positively with the €-15m in the same period of the previous year, which was severely affected by the effects of the COVID-19 pandemic.

The cumulative net attributable profits, in millions of euros, at the close of September 2021 for the various **business areas** that comprise the Group were as follows: €1,223m in Spain, €1,811m in Mexico, €583m in Turkey, €339m in South America and €205m in Rest of Business.

NET ATTRIBUTABLE PROFIT (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

NET ATTRIBUTABLE PROFIT EXCLUDING NON-RECURRING IMPACTS (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

General note: non-recurring impacts include: (I) BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021 in all periods; (II) the net cost related to the restructuring process as of 2Q21; and (III) the net capital gain from the bancassurance operation with Allianz as of 4Q20.

(1) At current exchange rates: +84.9%

TANGIBLE BOOK VALUE PER SHARE AND DIVIDENDS⁽¹⁾ (EUROS)

(1) Replenishing dividends paid in the period.

EARNING PER SHARE⁽¹⁾ AND ADJUSTED EARNING PER SHARE⁽¹⁾ (EUROS)

General note: adjusted earning per share excludes: (I) BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021, in all periods; (II) the net cost related to the restructuring process as of 2Q21; and (III) the net capital gain from the bancassurance operation with Allianz as of 4Q20. (1) Adjusted by additional Tier 1 instrument remuneration.

The Group's profitability indicators improved, both on a year-to-year basis and compared to the end of December 2020, in line with the favorable performance of the results.

ROE AND ROTE⁽¹⁾ (PERCENTAGE)

(1) Excludes: (I) BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021 in all periods; (II) the net cost related to the restructuring process as of Jan.-Sep.21; and (III) the net capital gain from the bancassurance operation with Allianz as of 2020.

ROA AND RORWA⁽¹⁾ (PERCENTAGE)

(1) Excludes: (I) BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021 in all periods; (II) the net cost related to the restructuring process as of Jan.-Sep.21; and (III) the net capital gain from the bancassurance operation with Allianz as of 2020.

Balance sheet and business activity

The most relevant aspects related to the **evolution** of the Group's balance sheet and business activity as of September 30, 2021 are summarized below:

- **Loans and advances to customers** (gross) recorded an increase of 1.5% compared to the end of December 2020, strongly supported by the performance of individuals (+2.5%), with growth in almost all geographical areas, except Rest of Business, highlighting the increase of consumer loans and credit cards in Turkey, Spain and Mexico. Loans to business also increased slightly (+0.6% in the year), thanks to the positive evolution in Mexico and Spain.
- **Customer funds** showed an increase of 1.5% compared to the end of December 2020, due to the favorable performance of demand deposits and off-balance sheet funds in all geographical areas (highlighting mutual funds in Spain and Mexico), which manage to offset the decline in time deposits (-16.5%) thanks to the lower balances recorded in Spain and, to a lesser extent, in Rest of Business.

General note: the assets and liabilities of BBVA USA and the rest of the companies which the Group owned in the United States, they have been transferred to PNC after the sale materialized on June 1, 2021, and are therefore not included in the consolidated BBVA Group balance sheet as of 30-09-2021. As the applicable accounting regulation indicates, they are classified, respectively, as non-current assets and liabilities held for sale, inside the other assets/other liabilities line of the consolidated BBVA Group Balance sheet as of 31-12-2020. For management purposes only in order to make the information comparable, the assets and liabilities of BBVA USA and the rest of the Group's companies in the United States included in the sale agreement signed with PNC are classified, respectively, in the other assets/other liabilities line of BBVA Group consolidated Balance sheet as of 30-09-2020.

Solvency

Capital base

BBVA Group's **fully-loaded CET1** ratio stood at 14.48% at September 30, 2021, which is an increase of +31 basis points above the previous quarter and amply covering the capital requirements of the BBVA Group (+588 basis points).

During the third quarter of 2021, the evolution of the consolidated fully-loaded CET1 ratio continued to be supported by recurrent organic capital generation, which net of dividends and remunerations of AT1 instruments, contribute up to +24 basis points. Apart from these items, the capital consumption due to organic activity evolution drained -3 basis points, while the evolution of the remaining components of the CET1 contributed +9 basis points. Among the latter, it is worth mentioning the positive contribution due to the parameters' update within the portfolios subject to the IRB credit risk method which has been partially offset by, among others, a negative evolution of market variables, in particular, the exchange rate.

The consolidated fully-loaded **additional Tier 1 capital** (AT1) stood at 1.91% as of September 30, 2021, which results in an increase of +4 basis points compared to the previous quarter.

The consolidated **fully-loaded Tier 2** ratio as of September 30, 2021 stood at 2.47%, an increase of +3 basis points in the quarter. The **total fully-loaded capital adequacy ratio** stands at 18.86%.

The **phased-in CET1** ratio, on consolidated terms, stood at 14.71% as of September 30, 2021, considering the transitory effect of the IFRS 9 standard. AT1 reached 1.90% and Tier 2 reached 2.56%, resulting in a total capital adequacy ratio of 19.17%.

Regarding shareholder remuneration, after the lifting of the recommendations by the European Central Bank, on September 30, 2021, BBVA informed that the BBVA's Board of Directors approved the payment in cash of €0.08 per BBVA share, as gross interim **dividend** against **2021 results**. The dividend was paid on October 12, 2021. This dividend is already considered within the capital ratios of the Group.

SHAREHOLDER STRUCTURE (30-09-2021)

Total capital ratio (%)	19.17	16.46	16.66	18.86	15.91	16.03

(1) As of September 30, 2021, the difference between the phased-in and fully-loaded ratios arises from the temporary treatment of certain capital items, mainly of the impact of IFRS 9, to which the BBVA Group has adhered voluntarily (in accordance with article 473bis of the CRR and the subsequent amendments introduced by the Regulation (EU) 2020/873).

(2) Preliminary data.

With regard to **MREL** (Minimum Requirement for own funds and Eligible Liabilities) requirements, on May 31, 2021, BBVA made public that it had received a new communication from the Bank of Spain on its minimum requirement for own funds and admissible liabilities (MREL) established by the Single Resolution Board (hereinafter SRB), calculated taking into account the financial and supervisory information as of December 31, 2019.

This communication on MREL replaces the one previously received and according to it, BBVA must reach, by January 1, 2022, an amount of own funds and eligible liabilities equal to 24.78%² of the total Risk Weighted Assets (hereinafter, RWAs) of its resolution group, at a sub-consolidated³ level (hereinafter, the "MREL in RWAs"). Also, of this MREL in RWAs, 13.50% of the total RWAs must be met with subordinated instruments (the "subordination requirement in RWAs"). This MREL in RWAs is equivalent to 10.25% in terms of the total exposure considered for the purposes of calculating the leverage ratio (the "MREL in LR"), while the subordination requirement in RWAs is equivalent to 5.84% in terms of the total exposure considered for calculating the leverage ratio (the "subordination requirement in LR"). In the case of BBVA, the requirement that is currently the most restrictive is that expressed by the MREL in RWAs. Given the structure of own funds and admissible liabilities of the resolution group, as of September 30, 2021, the MREL ratio in RWAs stands at 29.92%^{4,5}, complying with the aforementioned MREL requirement.

With the aim of reinforcing compliance with these requirements, in March 2021, BBVA carried out an issue of senior preferred debt for an amount of €1,000m. Afterwards, in September 2021, BBVA carried out an issue of €1,000m under a floating rate senior preferred social bond, maturing in two years. Both issuances have mitigated the loss of eligibility of three issuances, two senior preferred issues and one senior non-preferred issue issued during 2017 and reaching their maturity in 2021.

Lastly, the Group's **leverage** ratio stood at 7.5% fully-loaded (7.6% phased-in) as of September 30, 2021. These figures include the effect of the temporary exclusion of certain positions with the central banks of the different geographical areas where the Group operates, foreseen in the "CRR-Quick fix".

Ratings

During the first nine months of 2021, BBVA's rating has continued to demonstrate stability and all the rating agencies have confirmed its rating, maintaining it in the A category. Last June, in a joint review of several European banks, S&P changed the outlook of BBVA's rating to stable from negative (confirming its A- rating), acknowledging both the benefits of the Group's geographical diversification and the substantial capital reinforcement experienced after the BBVA USA sale.

The following table shows the credit ratings and outlook given by the agencies:

RATINGS

Rating agency	Long term (1)	Short term	Outlook
DBRS	A (high)	R-1 (middle)	Stable
Fitch	A-	F-2	Stable
Moody's	A3	P-2	Stable
Standard & Poor's	A-	A-2	Stable

(1) Ratings assigned to long term senior preferred debt. Additionally, Moody's and Fitch assign A2 and A- rating respectively, to BBVA's long term deposits.

² Pursuant to the new applicable regulation, the MREL in RWAs and the subordination requirement in RWAs do not include the combined requirement of capital buffers. For these purposes, the applicable combined capital buffer requirement would be 2.5%, without prejudice to any other buffer that may be applicable at any given time.

³ In accordance with the resolution strategy MPE ("Multiple Point of Entry") of the BBVA Group, established by the SRB, the resolution group is made up of Banco Bilbao Vizcaya Argentaria, S.A. and subsidiaries that belong to the same European resolution group. As of December 31, 2019, the total RWAs of the resolution group amounted to €204,218m and the total exposure considered for the purpose of calculating the leverage ratio amounted to €422,376m.

⁴ Own resources and eligible liabilities to meet, both, MREL and the combined capital buffer requirement, which would be 2.5%, without prejudice to any other buffer that may be applicable at any given time.

⁵ As of September 30, 2021, both the MREL ratio in RWAs and the next ratios shown hereafter are provisional: the MREL ratio in LR stands at 12.43% and the subordination ratios in terms of RWAs and in terms of exposure of the leverage ratio, stand at 26.60% and 11.05%, respectively.

Risk management

Credit risk

The local authorities of the countries in which the Group operates initiated economic support measures in 2020, after the outbreak of the pandemic, including the granting of relief measures in terms of temporary payment deferrals for customers affected by the pandemic, as well as the granting of loans covered by public guarantees, especially to companies and SMEs.

These measures are supported by the rules issued by the authorities of the geographical areas where the Group operates as well by certain industry agreements and should help to ease the temporary liquidity needs of the customers. The classification of the customers' credit quality and the calculation of the expected credit loss, once the credit quality of those customers have been reviewed under the new circumstances, will depend on the effectiveness of these relief measures. In any case, the incorporation of public guarantees is considered to be a mitigating factor in the estimation of the expected credit losses. The possibility of benefiting from this type of temporary deferral measures has expired in the main geographical areas where the Group is currently present.

Regarding the public guarantee programs, in Spain, following the publication of the RDL 5/2021 and the Code of Good Practices, to which BBVA has voluntarily adhered, term extensions could be requested until October 15, 2021, whereas in Peru, due to a new extension of the *Plan Reactiva*, it is allowed until December 31, 2021, as additional three months have been extended by the Royal Urgency Decree N° 091-2021 of September 29.

For the purposes of classifying exposures based on their credit risk, the Group has maintained a rigorous application of IFRS 9 at the time of granting the moratoriums and has reinforced the procedures to monitor credit risk both during their validity and upon their maturity. In this respect, additional indicators have been introduced to identify the significant increase in risk that may have occurred in some operations or a set of them and, where appropriate, proceed to classify it in the corresponding risk stage.

Likewise, the indications provided by the European Banking Authority (EBA) have been taken into account, to not consider as refinancing the moratoriums that meet a series of requirements, without prejudice to keep the exposure classified in the corresponding risk stage or its consideration as refinancing if it was previously so classified.

In relation to the temporary payment deferrals for customers affected by the pandemic, since the beginning BBVA worked on an anticipation plan with the goal of mitigating as much as possible the impact of these measures in the Group, due to the high concentration of its maturities over time. As of September 30, 2021, the payment deferrals granted by the Group following EBA criteria amounted to €1,036m.

Calculation of expected losses due to credit risk

To respond to the circumstances generated by the COVID-19 pandemic in the macroeconomic environment, characterized by a high level of uncertainty regarding its intensity, duration and speed of recovery, forward-looking information has been updated in the IFRS 9 models to incorporate the best information available at the date of the publication of this report. The estimation of the expected losses has been calculated for the different geographical areas in which the Group operates, with the best information available for each of them, considering both the macroeconomic perspectives and the effects on specific portfolios, sectors or specific debtors. The scenarios used consider the various economic measures that have been announced by governments as well as monetary, supervisory and macroprudential authorities around the world. However, the final magnitude of the impact of this pandemic on the Group's business, financial situation and results, which could be material, will depend on future and uncertain events, including the intensity and persistence over time of the consequences derived from the pandemic in the different geographical areas in which the Group operates.

The expected losses calculated according to the methodology provided by the Group, including macroeconomic projections, have been supplemented with quantitative management adjustments in order to include issues that might imply a potential impairment which, due to its nature, is not included in the model, which will be assigned to specific operations in case this impairment materializes (e.g. sectors and collectives more affected by the crisis).

The classification of vulnerable activities to COVID-19 was established at the outbreak of the pandemic, in order to identify activities susceptible to further deterioration in the Group's portfolio. Based on this classification, management measures were taken, with preventive rating adjustments and restrictive definition of risk appetite. Given the progress made during the course of the pandemic, which has led to the almost complete elimination of restrictions on mobility and the subsequent recovery from these restrictions, consideration is now being given to the specific characteristics of each client over and above their belonging to a particular sector. Therefore, maintaining this vulnerability classification is not considered necessary due to its low level of discrimination.

As of September 30, 2021, in order to incorporate those aspects not included in the impairment models, there are management adjustments to the expected losses amounting to €304m for the entire Group, €272m in Spain and €32m in Peru. As of June 30, 2021 this concept amounted to €348m in total, of which €315m were allocated to Spain and €32m to Peru. The variation in the quarter is therefore due to the use in Spain of €43m while the amount assigned to Peru remains unused.

BBVA Group's credit risk indicators

BBVA Group's main risk indicators have behaved as follows between January and September 2021, as a result, among other reasons, of the situation generated by the pandemic:

- **Credit risk** has increased by 0.4% (+0.4% at constant exchange rates). There was a slight increase at Group level in the quarter at constant rates, with Turkey leading growth along with Rest of Business. Spain recorded a slight decline while Mexico and South America remained practically flat, the latter with increases in almost all countries in the region. Compared to December, credit risk increased by 1.3% (+2.0% at constant exchange rates) with generalized growth except for Chile and Peru.
- **The balance of non-performing loans** decreased in the third quarter of the year (-5.2% both in current and constant terms) in the main geographical areas. Compared to the end of 2020, the balance decreased by 3.8% (-2.8% at constant exchange rates) overall due to the good performance of underlying flows, with controlled inflows and positive recoveries, in a more favorable economic environment than in previous quarters.

NON-PERFORMING LOANS⁽¹⁾ AND PROVISIONS⁽¹⁾ (MILLIONS OF EUROS)

(1) Excludes BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021.

- The **NPL ratio** stood at 4.0% as of September 2021 (4.2% in June, 2021), 21 basis points below the figure recorded in December 2020.
- **Loan-loss provisions** decreased by 5.6% compared to December 2020 (-1.1% in the quarter) due to the positive evolution of the non-performing loans and an increase in write-offs during the year.
- The **NPL coverage ratio** amounted to 80%, -149 basis points compared to the end of 2020. Compared to the previous quarter, the NPL ratio improved by 327 basis points as a result of the aforementioned good performance of the non-performing loans in the period.
- The cumulative **cost of risk** as of September 30, 2021 stood at 0.92% (-64 basis points below the end of 2020 and -9 basis points compared to June 2021). The loan-loss provisions carried out in the quarter were practically in line with those observed in the previous quarter, and were reflected in September in addition to the recurring flows of the month and the positive impact of the updated macroeconomic scenarios, partially mitigated by the effect of the annual recalibration on the Group's provisioning models.

NPL⁽¹⁾ AND NPL COVERAGE⁽¹⁾ RATIOS AND COST OF RISK⁽¹⁾ (PERCENTAGE)

(1) Excluding BBVA USA and the rest of the Group's companies in the United States sold to PNC on June 1, 2021.

CREDIT RISK⁽¹⁾ (MILLIONS OF EUROS)

	30-09-21	30-06-21	31-03-21	31-12-20	30-09-20
Credit risk	371,708	370,348	365,292	366,883	365,127
Non-performing loans	14,864	15,676	15,613	15,451	15,006
Provisions	11,895	12,033	12,612	12,595	12,731
NPL ratio (%)	4.0	4.2	4.3	4.2	4.1
NPL coverage ratio (%) ⁽²⁾	80	77	81	82	85

General note: figures excluding BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021, for the periods of 2021 and 2020, and the classification of BBVA Paraguay as non-current assets and liabilities held for sale for the periods of 2020.

(1) Includes gross loans and advances to customers plus guarantees given.

(2) The NPL coverage ratio includes the valuation adjustments for credit risk during the expected residual life of those financial instruments which have been acquired (mainly originated from the acquisition of Catalunya Banc, S.A.). Excluding these allowances, the NPL coverage ratio would stand at 78% as of September 30, 2021, 79% as of December 31, 2020 and 82% as of September 30, 2020.

(1) Preliminary data.

Structural risks

Liquidity and funding

Liquidity and funding management at BBVA aims to finance the recurring growth of the banking business at suitable maturities and costs, using a wide range of instruments that provide access to a large number of alternative sources of financing. In this context, it is important to notice that, given the nature of BBVA's business, the funding of lending activity is fundamentally carried out through the use of stable customer funds.

Due to its subsidiary-based management model, BBVA is one of the few major European banks that follows the Multiple Point of Entry (MPE) resolution **strategy**: the parent company sets the liquidity policies, but the subsidiaries are self-sufficient and responsible for managing their own liquidity and funding (taking deposits or accessing the market with their own rating), without fund transfers or financing occurring between either the parent company and the subsidiaries or between the different subsidiaries. This strategy limits the spread of a liquidity crisis among the Group's different areas, and ensures that the cost of liquidity and financing is correctly reflected in the price formation process.

In view of the initial uncertainty caused by the outbreak of COVID-19 in March 2020, the different central banks provided a joint response through specific measures and programs, whose extensions, in some cases, has been extended during 2021 to facilitate the financing of the real economy and the provision of liquidity in the financial markets, increasing liquidity buffers in almost all geographical areas.

The BBVA Group maintains a solid **liquidity** position in every geographical area in which it operates, with liquidity ratios well above the minimum required:

- The BBVA Group's **liquidity coverage ratio** (LCR) remained comfortably above 100% throughout the first nine months of 2021, and stood at 170% as of September 30, 2021. For the calculation of this ratio, it is assumed that there is no transfer of liquidity among subsidiaries; i.e. no type of excess liquidity levels in foreign subsidiaries are considered in the calculation of the consolidated ratio. When considering these excess liquidity levels, the BBVA Group's LCR would stand at 209%.
- The **net stable funding ratio** (NSFR), defined as the ratio between the amount of stable funding available and the amount of stable funding required, demands banks to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet activities. This ratio should be at least 100% at all times. The BBVA Group's NSFR ratio, calculated based on the criteria established in the Regulation (UE) 2019/876 of the European Parliament and the European Council, as of May 20, 2019; whose date of entry into force is June 2021, stood at 135% as of September 30, 2021.

The breakdown of these ratios in the main geographical areas in which the Group operates is shown below:

LCR AND NSFR RATIOS (PERCENTAGE. 30-09-21)				
	Eurozone ⁽¹⁾	Mexico	Turkey	South America
LCR	197	219	169	All countries >100
NSFR	126	143	158	All countries >100

(1) Perimeter: Spain + the rest of the Eurozone where BBVA has presence.

One of the key elements in BBVA's Group liquidity and funding management is the maintenance of large high quality liquidity buffers in all business areas where the group operates. In this respect, the Group has maintained for the last 12 months an average volume of high quality liquid assets (HQLA) accounting to €143.5 billion, among which, 94% correspond to maximum quality assets (LCR Tier 1).

The most relevant aspects related to the main geographical areas are the following:

- In the Eurozone, BBVA has continued to maintain a sound position with a large high-quality liquidity buffer. During the first nine months of 2021, commercial activity has drawdown liquidity amounting to approximately €7 billion mainly explained by outflows during the first quarter of wholesale deposits that held very high balances at the end of December 2020. It should be noted that in the second quarter of 2021, the payment of the BBVA USA sale transaction was collected. In March 2021, BBVA S.A. took part in the TLTRO III liquidity window program to take advantage of the improved conditions announced by the European Central Bank (ECB) in December 2020, with an amount drawn of €3.5 billion, which when added together with the €34.9 billion available at the end of December 2020 it totaled €38.4 billion. In this regard, the ECB continues to support liquidity in the system through the measures it has implemented since the start of the pandemic, but it should be noted that it announced a slight slowdown in the pace of asset purchases under its PEPP program (Pandemic Emergency Purchase Programme) during the fourth quarter of 2021.
- In BBVA Mexico, commercial activity has provided liquidity between January and September 2021 in the amount of approximately 25 billion Mexican pesos, derived from a higher growth in customer funds compared with the increase in lending activity. This increased liquidity is expected to be reduced due to the recovery in lending activity, favored by the better growth trend in the country. This solid liquidity position is enabling an efficiency policy in the funding costs, in an environment of higher interest rates. Looking at wholesale issuances, a senior issue amounting to 3,500 million Mexican pesos was absorbed in September without needing to be refinanced, as it also happened with the subordinated issue amounting to USD 750m which was absorbed in March, 2021 and a senior issue amounting to 1,000 million Mexican pesos which was absorbed in April.
- The Central Bank of the Republic of Turkey (CBRT) lowered 100 basis points in September, leaving the benchmark rate at 18%, based on a reduction in core inflation. During the first nine months of 2021, the Bank's lending gap has widened in local currency, with a higher increase in loans than in deposits. Regarding foreign currency, both loans and deposits have decreased by a similar amount. Garanti BBVA continues to maintain a comfortable liquidity position.
- In South America, the liquidity situation remains adequate throughout the region, helped by the support of various central banks and governments which, in order to mitigate the impact of the COVID-19 crisis, have acted by implementing measures to stimulate economic activity and provide greater liquidity in financial systems. In Argentina, liquidity in the system continues to increase due to higher growth in deposits than in loans in local currency. A comfortable liquidity position has been maintained in Colombia following the adjustment for excess liquidity made in the last quarters. Despite a more stable political environment, Fitch downgraded the country's rating at the beginning of the quarter. BBVA Peru maintains solid levels of liquidity, despite the current uncertain environment, which has been reflected in a downgrading of Moody's rating. During the last quarter there has been an improvement in credit gap, especially in local currency.

The **main transactions** carried out in wholesale financing markets by the companies that form part of the BBVA Group during the first nine months of 2021 were:

- On September 1, 2021, BBVA S.A. issued a social preferred senior debt totaling €1 billion with a floating rate and a 2-year expiration date. This is the second issue made in 2021, following the issuance of senior preferred debt carried out in March, and is also the fifth issuance carried out by BBVA, meeting environmental, social and governance criteria (ESG). For more information on the transactions see the "Solvency" chapter in this report.
- In Turkey, there have been no issuances between January and September 2021. On June 2, BBVA Garanti renewed the 100% of a syndicated loan indexed to sustainability criteria, formed by two separate sections, amounting to USD 279m and €294m with a 1-year expiration date. Another €560m syndicated loan expires in November and is expected to be renewed.
- In South America, BBVA Uruguay issued the first sustainable bond on the Uruguayan financial market in February for USD 15m at an initial interest rate of 3.854%.

Foreign exchange

Foreign exchange risk management of BBVA's long-term investments, principally stemming from its overseas franchises, aims to preserve the Group's capital adequacy ratio and ensure the stability of its income statement.

The U.S. dollar accumulated a 6.0% appreciation against the euro in the first nine months of 2021, thus reversing a large part of the depreciation which occurred last year. Among the emerging currencies, it is worth highlighting the good performance of the Mexican peso, which registered an appreciation of 2.8% against the euro since the end of 2020. The Turkish lira, which remained stable in the third quarter, accumulated a -11.5% depreciation against the euro in the first nine months of 2021. Political uncertainties have weighed down some South American currencies: Peruvian sol (-7.0%), Chilean peso (-6.2%) and Colombian peso (-5.1%). For its part, Argentine peso (-9.7%) continues with a moderate depreciation compared to previous years.

EXCHANGE RATES (EXPRESSED IN CURRENCY/EURO)

	Year-end exchange rates			Average exchange rates	
	30-09-21	Δ % on 30-09-20	Δ % on 31-12-20	Jan.-Sep.21	Δ % on Jan.-Sep.20
U.S. dollar	1.1579	1.1	6.0	1.1961	(6.0)
Mexican peso	23.7439	10.3	2.8	24.0762	1.9
Turkish lira	10.2981	(11.6)	(11.5)	9.7098	(21.8)
Peruvian sol	4.7824	(11.9)	(7.0)	4.5826	(15.1)
Argentine peso ⁽¹⁾	114.29	(22.0)	(9.7)	—	—
Chilean peso	930.48	(1.3)	(6.2)	881.98	2.2
Colombian peso	4,440.18	2.3	(5.1)	4,424.44	(5.8)

(1) According to IAS 29 "Financial information in hyperinflationary economies", the year-end exchange rate is used for the conversion of the Argentina income statement.

BBVA has maintained its policy of actively hedging its main investments in emerging markets, covering on average between 30% and 50% of annual earnings and around 70% of the CET1 capital ratio surplus. The closing of the sale of BBVA USA in June 2021 has modified the Group's CET1 fully-loaded ratio sensitivity to changes in the currencies. The most affected sensitivity by this change has been the U.S. dollar, which stands at around +18 basis points in the face of a 10% depreciation in the currency. The sensitivity of the Mexican peso is estimated at -5 basis points at the end of September 2021 and practically nil in the case of the Turkish lira, both currencies estimated against a depreciation of 10%. With regard to coverage levels of the expected results for 2021, these have remained stable this last quarter: 75% in Mexico and Turkey, and close to 100% in Peru and Colombia.

Interest rate

Interest rate risk management seeks to limit the impact that BBVA may suffer, both in terms of net interest income (short-term) and economic value (long-term), from adverse movements in the interest rate curves in the various currencies in which the Group operates. BBVA carries out this work through an internal procedure, pursuant to the guidelines established by the European Banking Authority (EBA), in order to analyze the potential impact that could derive from a range of scenarios on the Group's different balance sheets.

The model is based on assumptions intended to realistically mimic the behavior of the balance sheet. Of particular relevance are assumptions regarding the behavior of accounts with no explicit maturity and prepayment estimates. These assumptions are reviewed and adapted at least once a year to take into account any changes in behavior.

At the aggregate level, BBVA continues to maintain a moderate risk profile, in accordance with the established objective, showing positive sensitivity toward interest rate increases in the net interest income. The effective management of structural balance sheet risk has allowed it to mitigate the negative impact of the downward trend in interest rates and the volatility experienced as a result of the effects of COVID-19, and is reflected in the soundness and recurrence of net interest income.

At the market level, during the third quarter of 2021, there have been limited movements in the United States and European bond yield curves, generating a "U" movement, with rises starting in August due to the messages of the beginning of a gradual decrease in the extraordinary measures of expansionary monetary policy by both central banks. With regard to the emerging world, more virulent moves in bond yield curves due to the contagion effect of the latest rises in the U.S. yield curves, inflationary pressures and the continuation of the rate hike cycle (with the exception of Turkey, which dropped 100 basis points at September meeting). All of the above has had a limited impact on the generation of net interest income for the different units.

By area, the main features are:

- Spain has a balance sheet characterized by a high proportion of variable-rate loans (basically mortgages and corporate lending) and liabilities composed mainly of customer deposits. The ALCO portfolio acts as a management lever and hedging for the bank's balance sheet, mitigating its sensitivity to interest rate fluctuations. The balance sheet's profile has remained stable during the year, showing an interest net income sensitivity to 100 basis points increases by the interest rates around 20%.

On the other hand, the ECB held the marginal deposit facility rate unchanged at -0.50% and maintained the extraordinary support programs created after the outbreak of the COVID-19 crisis. This has created stability in European benchmark interest rates (Euribor) throughout the first nine months of 2021. In this matter, customer spread keeps pressured by the low interest rates environment.

- Mexico continues to show a balance between fixed and variable interest rates balances. In terms of assets that are most sensitive to interest rate fluctuations, the commercial portfolio stands out, while consumer loans and mortgages are mostly at a fixed rate. The ALCO portfolio is used to neutralize the longer duration of customer deposits. Net interest income sensitivity continues to be limited, registering a positive impact against 100 basis points increases in the Mexican peso which is around 2%. The monetary policy rate stands at 4.75%, higher than at the end of 2020 (4.25%), after a 25 basis points reduction during the first quarter of 2021 and a 25 basis points increase in June, August and September meetings. Regarding the consumer spread, a slight increase compared to first nine months of 2021 is appreciated, a trend which should continue due to the high interest rates environment.
- In Turkey, the sensitivity of loans, which are mostly fixed-rate but with relatively short maturities, and the ALCO portfolio balance the sensitivity of deposits on the liability side. The interest rate risk is thus limited, both in Turkish lira and in foreign currencies. With regard to base rates, there was an increase of 200 basis points in the first quarter compared to the level seen in December 2020; during the second quarter the base rates remained unchanged and in the third quarter there was a reduction of 100 basis points. The customer spread in Turkish lira improved from June onwards, benefiting from the refinancing of loans at higher rates. It is expected that it will continue to improve in an environment of lower interest rates.
- In South America, the risk profile for interest rates remains low as most countries in the area have a fixed/variable composition and maturities that are very similar for assets and liabilities, with a low net interest income sensitivity. In addition, in balance sheets with several currencies, interest-rate risk is managed for each of the currencies, showing a very low level of risk. Regarding the base rates of the central banks in Peru and Colombia, a rising trend in rates has begun, with increases in the last quarter of 75 and 25 basis points, respectively. In the first nine months of 2021 there has been little change in customer spreads, which are expected to improve in an environment of higher interest rates.

Business areas

This section presents and analyzes the most relevant aspects of the Group's different business areas. Specifically, for each one of them, it shows a summary of the income statement and balance sheet, the business activity figures and the most significant ratios.

The structure of the business areas reported by the BBVA Group as of September 30, 2021, differs from the one presented at the end of 2020, mainly as a consequence of the removal of the **United States** as a business area, derived from the sale agreement reached with PNC and closed on June 1, 2021, once the pertinent mandatory authorizations were obtained. BBVA continues to have a presence in the United States, mainly through the wholesale business which the Group develops in the New York branch and its broker dealer BBVA Securities Inc.

The composition of BBVA Group business areas is summarized below:

- **Spain** mainly includes the banking and insurance businesses that the Group carries out in this country, including the share of the results of the new company created from the bancassurance agreement reached with Allianz at the end of 2020.
- **Mexico** includes banking and insurance businesses in this country, as well as the activity that BBVA Mexico carries out through its branch in Houston.
- **Turkey** reports the activity of the group Garanti BBVA that is mainly carried out in this country and, to a lesser extent, in Romania and the Netherlands.
- **South America** mainly includes banking and insurance activity conducted in the region. The information for this business area includes BBVA Paraguay data for the results, activity, balances and relevant business indicators for 2020 and is not included in 2021 as the sale agreement was reached in January 2021.
- **Rest of Business** mainly incorporates the wholesale activity carried out in Europe (excluding Spain) and in the United States, as well as the banking business developed through BBVA's 5 branches in Asia.

The **Corporate Center** contains the centralized functions of the Group, including: the costs of the head offices with a corporate function; structural exchange rate positions management, portfolios whose management is not linked to customer relations, such as financial and industrial holdings, stakes in Funds & Investment Vehicles in tech companies including the venture capital fund Propel Venture Partners; certain tax assets and liabilities; funds due to commitments to employees; goodwill and other intangible assets as well as such portfolios and assets' funding. Additionally, the results obtained by BBVA USA and the rest of the companies included in the sale agreement to PNC until the closing of the transaction on June 1, 2021, are presented in a single line of the income statements called "Profit (loss) after taxes from discontinued operations". Finally, the costs related to the BBVA S.A. restructuring process in Spain, being considered such process an strategic decision, are included in this aggregate and are recognized in the line "Net cost related to the restructuring process".

In addition to these geographical breakdowns, supplementary information is provided for the wholesale business carried out by BBVA, **Corporate & Investment Banking (CIB)**, in the countries where it operates. This business is relevant to have a broader understanding of the Group's activity and results due to the important features of the type of customers served, products offered and risks assumed.

The information by business area is based on units at the lowest level and/or companies that comprise the Group, which are assigned to the different areas according to the main region or company group in which they carry out their activity. The figures corresponding to 2020 have been elaborated following the same criteria and the same structure of the areas previously explained, in a way that year-on-year comparisons are homogeneous.

Regarding the **shareholders' funds** allocation, a capital allocation system based on the consumed regulatory capital is used.

Finally it should be noted that, as usual, in the case of the different business areas in America, Turkey, Rest of Business and CIB, apart from including the year-on-year variations applying current **exchange rates**, the ones at constant exchange rates are also given.

MAIN INCOME STATEMENT LINE ITEMS BY BUSINESS AREA (MILLIONS OF EUROS)

	BBVA Group	Business areas					Σ Business areas	Corporate Center
		Spain	Mexico	Turkey	South America	Rest of Business		
Jan.-Sep.21

(1) Non-current assets and liabilities held for sale (NCA&L) from BBVA Paraguay as of 31-12-20.

BBVA Group, as of September 30, 2021, had 113,117 **employees**, 6,344 **branches** and 28,920 **ATMs**, a decrease of 8.2%, 14.6% and 6.7%, respectively, compared to the end of December 2020. The decrease was mainly due to the withdrawal of BBVA USA and the rest of the Group's companies in the United States following its sale on June 1, 2021, as well as the beginning of the employee departures and branch closures as a result of the restructuring plan of BBVA S.A. in Spain.

With regard to the number of employees in Mexico, there has been an increase, explained by the internalization of employees whose tasks are directly linked to the Bank's activity, in the context of the recent labor reform in the country.

NUMBER OF EMPLOYEES

NUMBER OF BRANCHES

NUMBER OF ATMS

Spain

Highlights

- Slight growth in lending activity throughout the year
- Improvement in the efficiency ratio
- Favorable year-on-year growth of recurring revenue due to the evolution of fees
- Decrease in impairment on financial assets, compared to a 2020 that was strongly affected by the pandemic, resulting in an improvement in the cost of risk

Macro and industry trends

The economy continues to recover against a backdrop in which the vaccine rollout has resulted in fewer infections and an easing of restrictions on mobility. Growth in the second quarter (1.1% quarterly) was lower than initially forecasted by BBVA Research, thus contributing to a downward revision of its **growth** forecast for 2021 from 6.5% to 5.2%. Europe is also experiencing a recovery, meaning that the ECB will reduce asset purchases under the PEPP program. Inflation continues to accelerate, as in other neighboring countries (in August, it stood at 3.3%, higher than forecasted by BBVA Research), driven mainly by energy.

With regard to the **banking system**, with data as of the end of July 2021, the volume of lending to the private sector recorded a slight decline of 0.3% since December 2020, following growth of 2.6% in 2020. The NPL ratio continued to decline to 4.39%, also at the end of July 2021 (4.51% at 2020 year-end). Therefore, the system maintained comfortable levels of capital adequacy and liquidity.

Activity

The most relevant aspects related to the area's **activity** during the first **nine months of 2021** were:

- **Lending activity** (performing loans under management) was slightly higher than at the end of 2020 (+0.2%) mainly due to growth in loans to SMEs (+6.2%) and consumer loans (+6.3% including credit cards),
- With regard to **asset quality**, the non-performing loan ratio decreased by 8 basis points in the quarter to stand at 4.1%, mainly due to the positive evolution of the underlying flows, and specially to the recovery of certain wholesale customers, contributing to an increase in the average coverage up to 65% as of September 30, 2021.
- **Total customer funds** remained stable (-0.7%) compared to 2020 year-end, thanks to the good performance of off-balance sheet funds (+7.0%), which partially offset the decrease in customer deposits under management (-3.0%) due to the lower balance of time deposits held by retail clients in a low interest rate environment.

The most relevant aspects related to the area's **activity** in the third **quarter of 2021** were:

- **Lending activity** (performing loans under management) was slightly down from the previous quarter (-0.8%), mainly due to the decrease in lending to the public sector (-11.9%), which was partially offset by growth in the SME segments (+1.8%) and in consumer finance and credit cards (+1.6 %).
- **Total customer funds** remained stable throughout the quarter (+0.3%), thanks to growth of demand deposits (+1.6%) and off-balance sheet funds (+1.1%), which offset the decrease in time deposits (-11.7%).

Results

Spain generated a net attributable **profit** of €1,223m during the first nine months of 2021, up +160.9% from the result posted in the same period of the previous year, mainly due to the increased provisions for impairment on financial assets as a result of the COVID-19 outbreak and provisions made in both cases in 2020, as well as the increased contribution from commission fees and NTI in 2021.

The most notable aspects of the **year-on-year changes** in the area's income statement at the end of September 2021 were:

- **Net interest income** continues to decrease compared to the same period last year, although at a slower rate (-1.9% compared to -2.2% year-on-year at the end of June 2021), affected by the context of falling interest rates and partially offset by lower financing costs.
- **Net fees and commissions** continued to show positive performance (+18.0% year-on-year), mainly favored by a greater contribution from revenues associated with asset management activities and the contribution of banking and insurance services, in the latter case, by the bancassurance operation with Allianz.
- **NTI** at the end of September 2021 continued to show significant year-on-year growth of 40.7%, mainly due to the results of the Global Markets unit.
- The other **operating income and expenses** line performed poorly compared to the first nine months of the previous year (€19m accumulated at the end of September 2021 compared to €141m accumulated at the end of September 2020), mainly due to the greater contribution to the Single Resolution Fund (SRF) and the lower contribution from the insurance business in this line due to the bancassurance operation with Allianz.
- **Operating expenses** were down (-1.7% in year-on-year terms) as a result of the reduction in both the depreciation line, personnel expenses and general expenses.
- As a result of the growth in gross income and the aforementioned reduction in expenditure, the **efficiency ratio** stood at 49.3%, compared to 52.0% recorded at the end of September 2020.
- **Impairment on financial assets** totaled €-402m, a significant reduction from the amount recorded in the first nine months of 2020, mainly due to the negative impact of the worsening macroeconomic scenario caused by the pandemic following the outbreak of COVID-19 in March 2020, as well as the improvement of said scenario in 2021. For its part, the accumulated cost of risk remained on a downward trend and stood at 0.32% as of September 30, 2021.
- The **provisions and other results** line closed at €-242m, which was well below the €-430m recorded in the same period last year, which included provisions for potential claims.

In the **third quarter** of 2021, Spain generated a net attributable profit of €478m (+31.2% compared to the previous quarter). Performance has mainly been favored by the contribution to the SRF made in the second quarter of 2021 and the lower loan allowance for impairment on financial assets, which have largely offset the decrease in recurring income, affected by summer season, and the lower NTI, due to the lower results of the Global Markets unit between July and September.

Mexico

Highlights

- Growth in lending activity in the first nine months of the year driven by the acceleration in the retail portfolio
- Good performance of customer funds continues, as a result of growing demand deposits, which allows for an improvement in the funding mix of BBVA Mexico
- Increase in recurring income and strength of operating income
- Decrease in impairment on financial assets, compared to the first nine months of 2020, which were strongly affected by the pandemic

Macro and industry trends

Economic **growth** shows signs of moderation following the strong expansion recorded in the first half of 2021. BBVA Research estimates that GDP will expand by 6.0% in 2021, two tenths below its previous forecast. In an environment of relatively weak domestic demand, the price of commodities and certain production inputs has increased inflationary pressures, which have led Banxico to raise monetary policy interest rates to 4.75% in September, from 4.0% in May.

With regard to the **banking system**, based on data at the end of August 2021, the system's lending volume increased slightly since December 2020 (+0.9%), showing strong growth in the mortgage portfolio (+5.8% since the end of 2020), while deposits increased slightly (+1.6 since December 2020). The NPL ratio in the system recorded slight improvement, reaching an NPL ratio of 2.32% at the end of August (+2.56% in December last year) and capital indicators, by their part, remained comfortable.

Unless expressly stated otherwise, all the comments below on rates of change, for both activity and results, will be given at constant exchange rate. These rates, together with changes at current exchange rates, can be found in the attached tables of financial statements and relevant business indicators.

Activity

The most relevant aspects related to the area's **activity** during the first **nine months** of **2021** were:

- **Lending activity** (performing loans under management) grew 3.1% compared to December 2020 thanks to the performance of the retail segment (+6.3%), which continued to show the dynamism that began in the second quarter of 2021. Within the retail segment, the mortgage portfolio was once again notable (+6.5% compared to December 2020). Consumer finance and credit cards accelerated its growth rate (+4.5% in the first nine months of 2021), and so did SME financing which was up 13.7% compared to the end of December 2020. The promotion of the business model for the SME segment has allowed the product offering to be expanded and the commercial effort to be increased with more qualified personnel to meet needs and thus increase the number of customers. Meanwhile, the wholesale portfolio posted slight growth compared to the end of December 2020 (+0.6%). As a result of the above, BBVA Mexico's mix shows an increase toward the most profitable portfolio, with the retail portfolio representing 51% and the wholesale portfolio 49%.
- With regard to **asset quality** indicators, the NPL ratio recorded a decrease of 51 basis points in the third quarter of 2021 to stand at 2.5%, as a result of practically flat activity (excluding the exchange rate effect), a slight decrease in non-performing loans due to higher write-offs and contained wholesale entries. Meanwhile, the NPL coverage ratio improved due to the positive dynamics of NPL flows in the quarter, standing at 131%.
- **Customer deposits** under management showed an increase of 4.7% during the first nine months of 2021. This performance is explained by growth of 6.8% in demand deposits, due to customers' preference for having liquid balances in an uncertain environment, compared to the decline observed in time deposits (-4.3%). The above has allowed BBVA Mexico to improve its deposits mix, with 82% of total deposits in lower-cost funds. Mutual funds grew 7.8% between January and September 2021, favored by an improved offering which recently includes funds linked to environmental, social and governance (ESG) factors.

The most relevant aspects related to the area's **activity** during the third **quarter** of 2021 were:

- **Lending activity** (performing loans under management) grew 1.2% in the quarter thanks to the good performance of practically all portfolios in the retail segment (+2.9%), while the wholesale portfolio remained stable (-0.3%), due to maturities and repayments of commercial and corporate loans that have materialized between July and September, offset in part by the good performance of loans to the government (+2.0%), by actively participating in bidding processes.
- **Total funds** under management increased in the quarter (1.5%) with growth in both demand deposits and time deposits, which recorded growth of 1.9%, the latter favored by Banxico's recent increases in interest rates by 75 basis points. Mutual funds closed September with growth of 1.7%.

Results

BBVA Mexico posted a net attributable **profit** of €1,811m accumulated at the end of September 2021, representing a 47.4% increase compared to the same period in 2020, which was significantly affected by the COVID-19 pandemic.

The most relevant aspects of the **year-on-year changes** in the income statement at the end of September 2021 are summarized below:

- **Net interest income** closed up higher than the figure posted between January and September 2020 (+4.1%), due to lower financing costs, the negative impact on this line of customer support measures against a backdrop of the pandemic in the second quarter of 2020 and, to a lesser extent, the improvement in the portfolio mix in 2021. Also notable is the upward trend toward recovery in the new retail loan origination, which is already reflected in this line.
- **Net fees and commissions** increased 15.5% thanks to increased number of transactions, especially on credit cards, and thanks to fees and commissions arising from investment banking operations and mutual fund management.
- **NTI** decreased by 24.8% year-on-year, mainly due to lower results from the Global Markets unit in 2021, as well as lower results from ALCO portfolios.
- The **other operating income and expenses** line increased by 15.6% year-on-year as a result of the extraordinary revenue generated by the effects of initiatives aimed at transforming the production model, which have allowed the level of fraud to be reduced and operational efficiencies to have increased. All this enabled growth in this line of the income statement, despite lower results from the insurance unit, which was mainly affected by increased claims.

- **Operating expenses** increased (+9.5%) in an environment of high inflation, mainly due to higher personnel expenses against a backdrop of increased activity. Also contributing to the year-on-year growth is the fact that certain expenses were not incurred in 2020 as a result of the pandemic, and thus increased general expenses in 2021, like technology expenses, among others.
- The **impairment on financial assets** line item decreased significantly compared to the same period last year (-39.7%), mainly due to additional provisions for COVID-19 recorded in 2020 and to better-than-expected portfolio performance. With regard to the cumulative cost of risk as of September 2021, this continued on its downward trend and stood at 2.70%.
- The **provisions and other results** line showed a favorable comparison, driven by higher sales of foreclosed assets in 2021 and lower provisions related to contingent risks compared to those recorded during the first nine months of 2020.

This **quarter**, BBVA Mexico generated a net attributable profit of €673m, with growth of +5.8% compared to the previous quarter, influenced by the good performance of recurring revenue items (+4.9%), the increase in operating expenses against a backdrop of recovering activity (+3.4%), increased provisions for impairment on financial assets (+15.7%, below the recurring historical level prior to the outbreak of the pandemic), and a downward adjustment in the effective tax rate.

Turkey

Highlights

- Activity growth driven by Turkish lira loans and deposits
- Outstanding performance of NTI and net fees
- Downward trend in the cost of risk continues
- Net attributable profit growth driven by lower impairment losses on financial assets, compared to 2020 which was strongly affected by the effects of the pandemic

Macro and industry trends

Economic activity indicators continue to show strength, suggesting that GDP could grow by 9.5% in 2021, according to BBVA Research's estimate. Economic dynamism, as well as the recent depreciation of the Turkish lira and the prices of certain commodities, have contributed to annual inflation rising to 19.6% at the end of September 2021. Despite inflationary pressures, the Central Bank of the Republic of Turkey has cut benchmark interest rates by 100 basis points to 18.0% in September 2021.

With regard to the **banking system**, based on data as of August 2021, the total volume of lending in the system increased by 9.3% since December 2020 (+8.1% in Turkish lira and +11.8% in foreign currency), while deposits grew by 13.2%, these growth rates include the effect of inflation. The NPL ratio stood at 3.67% at the end of August 2021 (4.08% at the end of 2020).

Unless expressly stated otherwise, all comments below on rates of changes for both activity and income, will be presented at constant exchange rates. These rates, together with changes at current exchange rates, can be observed in the attached tables of the financial statements and relevant business indicators.

Activity

The most relevant aspects related to the area's **activity** during the **first nine months** of 2021 were:

- **Lending activity** (performing loans under management) increased by 17.7% between January and September 2021, driven by the growth in Turkish lira loans (+22.3%) which was supported mainly by consumer loans, thanks to the strong origination in General Purpose Loans, and also by credit cards, mortgage and commercial loans. Foreign-currency loans (in U.S. dollar) contracted during the first nine months of 2021 (-8.2%).
- In terms of **asset quality**, the NPL ratio decreased 81 basis points to 6.5% compared to June 2021, due to contained non-performing loans together with strong recoveries in the wholesale portfolio and an increase in activity focused on the retail portfolio. The NPL coverage ratio stood at 78% as of September 30, 2021, with an increase of 863 basis points in the quarter, mainly due to the good performance of non-performing loans.
- Customer **deposits** under management (67% of total liabilities in the area as of September 30, 2021) remained as the main source of funding for the balance sheet and increased by 18.6%. It is worth highlighting the positive performance of Turkish lira demand deposits (+29.9%), which represent 27% of total customer deposits in local currency, as well as time deposits (+16.2%). By its part, the evolution of off-balance sheet funds (+50.6%) also stood out. In line with the sector trend, foreign currency deposits decreased by 2.0%.

The most relevant developments in the area's **activity** in the third **quarter** of 2021 were:

- **Lending activity** (performing loans under management) was above the previous quarter (+6.3%) as a result of the evolution in Turkish lira loans, with a particular focus on consumer loans (+9.8%) and credit cards (+13.0%), with flat performance in the commercial portfolio between July and September.
- **Total funds** under management showed a positive quarterly evolution (+4.5%), highlighting the growth of demand deposits, both in local and foreign currencies, as well as the increase in off-balance sheet funds.

Results

Turkey generated a net attributable **profit** of €583m in the first nine months of 2021, 48.4% higher than in the same period of the previous year, which was impacted by a strong increase in the impairment losses on financial assets due to the COVID-19 pandemic. Taking into account the effect of the depreciation of the Turkish lira over the period, the results generated by Turkey increased by 16.1%.

The most significant aspects of the year-on-year evolution in the area's income statement at the end of September 2021 are the following:

- **Net interest income** declined by 4.9% mainly due to contraction in the customer spread and increasing funding costs, despite higher loan volume and higher contribution from inflation-linked bonds.
- **Net fees and commissions** grew significantly (+44.6% year-on-year) mainly driven by the positive performance in brokerage fees and payment systems.
- **NTI** performed significantly well (+48.1%), mainly due to the positive impact of trading transactions in foreign currencies, the profit from the Global Markets unit and securities transactions.
- **Other operating income and expenses** increased by 104.3% between January and September, compared to the same period in 2020, mainly due to the positive contribution of the subsidiaries of Garanti BBVA, with the renting activity standing out.
- **Operating expenses** increased by 18.5%, impacted by the higher average annual inflation rate, the depreciation of the Turkish Lira and increased activity. On the other hand, there was a reduction in some discretionary expenses in 2020 due to COVID-19, affecting the year-on-year evolution. Nevertheless, the efficiency ratio remained low (30.4%).
- **Impairment losses on financial assets** decreased by 55.8% compared to those registered between January and September 2020, mainly due to the negative impact of the deterioration in the macroeconomic scenario as a result of the outbreak of the COVID-19 pandemic in March 2020, as well as the improvement of said scenario in 2021. At the end of September 2021, recoveries and repayments from one-off clients were registered. As a result of the aforementioned, the cumulative cost of risk decreased to 0.88% at the end of September 2021.

- The **provisions and other results** line closed September with a profit of €59m, compared to the loss of €-70m recorded in the same period of the previous year, mainly thanks to capital gains from the sale of real estate assets and lower provisions for special funds and contingent liabilities and commitments.

Turkey generated a net attributable profit of €207m in the **quarter**, which represents an increase of 2.6% compared to the previous quarter, mainly due to the positive evolution of the net interest income, which increased by +19.7%, promoted by loans in Turkish lira, improvement in customer spreads and the higher contribution of inflation-linked bonds. The latter was in part offset by an increase in the impairment of financial assets in the quarter (+35.9%) and the upward adjustment of the effective tax rate, resulting from the tax reform implemented in April 2021.

South America

Highlights

- Growth in lending activity between January and September, with greater dynamism from April onwards
- Reduction in higher-cost customer funds
- Year-on-year increase in recurring income and NTI, and higher adjustment for inflation in Argentina
- Year-on-year comparison influenced at the net attributable profit level as a result of the increase in the impairment on financial assets line in 2020 due to the outbreak of the pandemic

Unless expressly stated otherwise, all the comments below on rates of change, for both activity and results, will be given at constant exchange rates. These rates, together with the changes at current exchange rates, can be found in the attached tables of the financial statements and relevant business indicators. The information for this business area includes BBVA Paraguay with regard to data on the results, activity, balance sheet and relevant business indicators for 2020, but does not include Paraguay for 2021, as the sale agreement materialized in January of that year. To facilitate an homogeneous comparison, the attached tables include a column at constant exchange rates that does not take BBVA Paraguay into account. All comments for this area also exclude BBVA Paraguay.

Activity and results

The most relevant aspects related to the area's **activity** during the first **nine months** of 2021 were:

- **Lending activity** (performing loans under management) registered an increase of +5.8% compared to December 2020. By portfolio, the wholesale portfolio recorded an increase of +4.8% and the retail portfolio grew +6.8%.
- With regard to **asset quality**, the NPL ratio stood at 4.5%, a decrease of 13 basis points compared to the end of the first half of 2021, with a generalized decrease in the main countries in the area, due to lower inflows and a higher level of write-offs and recoveries.
- Customer **funds** under management increased by (+5.0%) compared to December 2020 closing balances. Deposits from customers under management increased by +5.7%, despite efforts in some countries to reduce higher-cost resources in an environment whereby the Group's liquidity situation throughout the region is adequate. Off-balance sheet funds increased +3.4% in the area as a whole between January and September 2021.

The most relevant aspects of the area's **activity** in the **quarter** were:

- **Lending activity** (performing loans under management) was higher than in the previous quarter (+1.0%), mainly thanks to the good performance of consumer loans and credit cards (+3.1% and +6.5%, respectively).
- Total **customer funds** increased in the quarter, boosted by growth in both demand deposits (+1.6%) and off-balance sheet funds (+1.9%).

With regard to the **interannual evolution** of South America, the area generated a cumulative **net attributable profit** of €339m between January and September 2021, representing a year-on-year variation of +35.6%, mainly due to the improved performance of recurring income and NTI in 2021 (+18.8%), despite COVID-19 outbreaks and restrictions on mobility which have been in force during part of 2021 in some countries of the region. This comparison is also affected by the significant provision for impairment on financial assets made in 2020, also caused by COVID-19. The accumulated impact at the end of September 2021 derived from inflation in Argentina on the attributable profit of the area was a loss of €-125m, compared to a cumulative loss of €-82m at the close of September 2020.

In the **quarter**, South America generated a net attributable profit of €124m, supported mainly by the good performance of recurring revenues (+10.1% compared to the previous quarter), which, together with a lower level of provisions for impairment on financial assets (-8.5%), offset the lower NTI results and the increase in operating expenses in the context of higher activity.

More detailed information on the most representative countries of the business area is provided below:

Argentina

Macro and industry trends

Within the framework of reduction in the number of infections and the acceleration of vaccination in recent months, **economic activity** continues to gradually recover from the sharp drop in GDP recorded in 2020. Thus, BBVA Research estimates that GDP growth will reach 7.5% in 2021. Inflation remains high and the exchange rate continues to gradually depreciate.

The **banking system** continues to be influenced by the high inflation scenario. At the end of July 2021, lending grew by 14.2% with regard to December 2020, while deposits grew by 25.6%. In addition, the NPL ratio increased during the second quarter of 2021 to 4.8% (+1 percentage point compared to the first quarter of 2021).

Activity and results

- **Lending activity** increased 16.9% compared to the close of December 2020, a figure that is below inflation, with growth in the retail segment (+22.6%), focused on credit cards (+20.5%) and corporate (+8.3%). The NPL ratio slightly decreased in the quarter to 2.6% driven by the increase in activity and a better performance of recoveries.
- Balance sheet **funds** continued to grow (+32.1% between January and September 2021) both from individuals and wholesale, while off-balance sheet funds increased 91.1% compared to December 2020.
- In the third quarter of 2021, Argentina recorded a good performance in recurring revenues, offset by higher operating expenses. The cumulative attributable **profit** at the end of September 2021 stood at €42m, as a consequence of the good performance of the recurring revenues from commission fees and a higher contribution from NTI from foreign currency derivatives transactions, offset by higher expenses and higher provisions compared to 2020.

Colombia

Macro and industry trends

The improvement of the epidemiological situation has supported the **economic** recovery process. Recent indicators show that GDP could grow 9.2% this year according to BBVA Research. In line with global trends, inflation has risen more than expected and reached 4.4% at the end of August. In this context, the Central Bank has started the interest rate hike cycle earlier than expected.

Total lending in the **banking system** is recovering (+3.4% at the end of July 2021, in a year-to-date comparison) after some months of weak growth, driven by credit to households, both the consumer portfolio (+3.3%) and companies (+4.2%), which offset the fall in mortgages (-1.1%). Furthermore, total deposits slowed down after growing by 2.8% at the end of July 2021, in a year-to-date comparison. The system's NPL ratio at the end of July 2021 remained stable at 4.61%.

Activity and results

- **Lending activity** grew by 6.4% compared to 2020 year-end thanks to the performance of wholesale portfolios (+9.1%) and retail portfolios (+4.9%). In terms of asset quality, there was a slight quarterly reduction in the NPL ratio to 5.3% as a result of contained NPL entries, higher recoveries (mainly in wholesale portfolios) and higher activity at the close of September 2021.
- **Deposits** from customers under management increased by 5.8%, compared to 2020 year-end, with a significant reduction in the cost of such deposits. Off-balance sheet funds closed with a negative variation of 29.4% in the nine-month period due to the volatility of investments made by institutional customers.
- In the third quarter of 2021, BBVA Colombia recorded a slight reduction in gross margin since the good evolution of the net interest income was offset by lower commission fees and NTI, along with an increase in personnel expenses in a context of higher activity. The **attributable profit** for the first nine months of 2021 stood at €159m, well above (+65.0% year-on-year) the €103m reached between January and September 2020, thanks to the performance of net interest income and commissions, as well as lower provisions for impairment on financial assets compared to the same period of the previous year, when they increased notably due to the outbreak of the pandemic.

Peru

Macro and industry trends

The economic recovery continues, reinforcing BBVA Research's outlook that GDP **growth** could be around 12.2% in 2021. Rising inflation has led the Central Bank to raise interest rates earlier than expected.

The **banking system** continues to be influenced by the effects of supportive policies in the context of the COVID-19 pandemic, although expanding at a more moderate rate during June 2021, with growth in loans and deposits of 4.2% and 0.8%, respectively in a year-to-date comparison. In addition, the NPL of the system is still contained at 3.11%.

Activity and results

- **Lending activity** closed September with a favorable growth of 4.1% compared to 2020 year-end, mainly due to the performance of mortgages, consumer finance (+6.2% and +16.6%, respectively) and growth in corporate lending (+3.8% compared to 2020 year-end), which captured liquidity in order to weather political uncertainty caused by the electoral process. The NPL ratio improved in the third quarter of 2021 to 4.7% due to write-offs. The NPL coverage ratio remained stable at 101%.
- **Deposits** from customers under management fell 3.4% in the first nine months of 2021, with a decrease in time deposits to reduce its cost. Off-balance sheet funds also declined compared to the close of December 2020 (-22.2%).
- In the third quarter, BBVA Peru has shown a good evolution of recurring income, but a reduction in NTI driven by the negative impact in derivatives positions as a consequence of the increase in rates carried out by the Central Bank. In the year-on-year evolution of the income statement, recurring income grew by 9.5%, thanks to the favorable evolution of the interest margin and commissions (which grew by 5.0% and 26.9%, respectively). Year-on-year reduction in provisions for impairment on financial assets (-6.1%), as a result of higher provision charges in 2020 following the pandemic outbreak. As a result, net attributable **profit** stood at €79m, 21.7% higher than the figure posted between January and September 2020.

Rest of Business

Highlights

- Increase in lending due to quarterly performance and the decrease in customer funds between January and September, with growth in the third quarter
- Favorable performance of risk indicators in the quarter
- Continued good performance of net interest income from the branches in Asia and the NTI from the area as a whole
- Reversal in the impairment on financial assets line, which compares to a 2020 strongly affected by the outbreak of the pandemic

(2) Excluding repos.

(3) Includes pension funds.

Unless expressly stated otherwise, all the comments below on rates of change, for both activity and results, will be given at constant exchange rates. These rates, together with the changes at current exchange rates, can be found in the attached tables of the financial statements and relevant business indicators. Comments that refer to Europe exclude Spain.

Activity

The most relevant aspects of the activity of Rest of Business of BBVA Group during the first **nine months** of **2021** were:

- **Lending activity** (performing loans under management) increased during the first nine months of the year (+2.6%), thanks to the business growth of the BBVA's branches located in Asia.
- Regarding **credit risk** indicators, the NPL ratio stood at 0.9%, 8 basis points below the end of June 2021 due to an improvement in the behavior of non-performing loans in Europe, improving the coverage rate to 98%.
- Customer **deposits** under management decreased by 22.4% mainly due to a decrease in deposits from wholesale customers in the New York branch.

The most relevant developments in the area's **activity** in the third **quarter** of **2021** were:

- **Lending activity** (performing loans under management) increased by 2.6% compared to the previous quarter due to the favorable performance of lending to the public sector, mainly in Asia.
- Total customer **deposits** under management increased in the quarter (+5.5%) thanks to the growth of demand deposits (+9.6%) in Europe, excluding Spain.

Results

The most significant aspects of the **year-on-year** evolution in the area's income statement at the end of September 2021 are the following:

- The **net interest income** decreased -5.1% compared to the same period of the previous year, mainly due to the evolution of the New York branch.
- Net **commissions** fell by 26.4% compared to the end of September 2020, due to lower issuance and advisory fees in Europe and, in particular, due to lower contribution from BBVA Securities, the Group's broker-dealer in the United States.
- The **NTI** line increased (+17.6% year-on-year) driven by a better performance of BBVA Securities, the business in Europe and branches in Asia.
- Year-on-year decrease in **operating expenses** (-3.0% year-on-year) due to lower expenses recorded by BBVA Securities.
- The **impairment on financial assets** line closed September with a reversal of €20m, which positively compares against the €-100m recorded twelve months earlier, mainly explained by the positive evolution of impaired clients of the New York branch and the retail portfolio in Europe.
- As a result, the area's cumulative **net attributable profit** between January and September 2021 was €205m (+32.1% year-on-year).

In the **third quarter** of 2021, the Group's Rest of Business as a whole generated a net attributable profit of €58 million (-17.2% compared to the previous quarter) as a result of lower fees and commissions (-16.1%), a negative result in the other operating income and operating expenses line that contrasts with the positive result of the previous quarter, as well as lower reversals in the impairment on financial assets and provisions line. This was partly offset by a reduction in operating expenses (-13.9%) and a lower effective tax rate.

Results

The Corporate Center recorded a **net attributable** loss of €433m between January and September 2021, excluding certain **non-recurring impacts**, among them:

- The profit/(loss) after tax from **discontinued operations** which includes the results generated by the Group's businesses in the United States prior to its sale to PNC on June 1, 2021, which amounted to a positive result of €280m, while at the end of September 2020 it stood at €-2,031m, including the goodwill impairment in the United States which amounted to €-2,084m.
- The **net cost related to the restructuring process** of BBVA S.A. in Spain which amounted to €-696m, of which, before tax, €-754m correspond to the collective layoff and €-240m to branches closures.

Including both non-recurring impacts, the Corporate Center recorded a cumulative **net attributable loss** of €-849m at the end of September 2021, showing a significant improvement over the previous year.

In addition to the aforementioned, the most relevant aspects of the **year-on-year** evolution are summarized below:

- **Net fees and commissions** also evolved positively, since those from the previous year recorded expenses associated with the issuance of the first green convertible bond (CoCo) for an amount of €1,000m in July 2020.
- **NTI** increased by 24.2% as a result, mainly, of the valuation of the Group's stakes in Funds & Investment Vehicles in tech companies.
- The **other operating income and expenses line** registered a positive result at the end of September 2021, mainly due to higher dividend income obtained from the Group's stake in Funds & Investment Vehicles in tech companies.
- Finally, losses recorded under the **provisions or reversal of provisions and other results line** were significantly lower than those recorded in the same period of the previous year, mainly due to the deterioration of investments in subsidiaries or joint venture businesses in 2020.

Other information: Corporate & Investment Banking

Highlights

- Lending activity balances above pre-pandemic levels and reduced customer funds
- Growth of recurring income and good performance of NTI
- Efficiency ratio remains at low levels
- Significant reduction in the impairment on financial assets line, compared to 2020 which was strongly affected by the effects of the pandemic

Unless expressly stated otherwise, all the comments below on **rates of change**, for both activity and results, will be given at constant exchange rates. These rates, together with changes at current exchange rates, can be found in the attached tables of financial statements and relevant business indicators.

Activity

The most relevant aspects related to the area's activity between January and September 2021 were:

- **Lending activity** (performing loans under management) remains above the level prior to the outbreak of the pandemic in March 2020, with a slight increase (+0.9%) compared to the end of the same year. By geographical areas, Asia, Turkey and, to a lesser extent, South America showed positive evolution during the period.
- **Customer funds** fell by 13.4% in the first nine months of 2021, due to some transactions originated in the last months of 2020 that had not been renewed in 2021, being this trend widespread in all business areas, except for Mexico, which recorded a growth of 3.8% between January and September 2021.

The most significant aspects of the evolution in the area's **activity** in the **third quarter** of **2021** were:

- **Lending activity** (performing loans under management) remained stable in the quarter (+0.9%), mainly due to the good performance in Asia and Turkey.
- **Customer funds** decreased slightly in the quarter (-0.8%) due to lower customer deposits balances (-1.0%) in Turkey and South America.

Results

CIB generated a **net attributable profit** of €955m between January and September 2021, which represents an increase of 42.1% on a year-to-year basis, thanks to the growth in recurring income and NTI as well as lower provisions for impairment on financial assets, which increased significantly in 2020 due to the COVID-19 pandemic.

The most relevant aspects of the year-on-year evolution in the income statement of Corporate & Investment Banking are summarized below:

- **Net interest income** sustained double-digit growth (+11.2%), supported by the evolution in Spain, Mexico and Turkey. In addition to the performance of lending activity, where a lower volume is observed, it is worth noting the commercial effort to adjust the price of certain transactions, one of the strategic focuses of the area in 2021, which has led to an improvement in profitability per transaction.
- Growth was also observed in **net fees and commissions** (+6.8%), mainly due to the performance of investment and transactional banking, the latter benefiting from the reactivation of business in 2021. On the contrary, Global Markets' operations have slowed down due to the access to the primary market by some customers. By geographical areas, positive performance of Mexico, South America and Turkey stood out.
- **NTI** continued showing a good performance, due to the proper management of market positions, with a very strong first and second quarter, while the third quarter of 2021 was affected by the seasonality in Spain and lower results in Mexico and Peru.
- The **operating expenses** increased by 7.6% between January and September, in a year-on-year comparison affected by the supportive schemes implemented by the area in 2020 which have not occurred in 2021 after the return to normality, although the area continues to focus its efforts on vacancy management and discretionary expenses.
- Provisions for **impairment on financial assets** decreased significantly compared with the same period last year, with the third quarter of 2021 highly benefiting from improved outlook, compared to 2020 which was severely affected by provisions related to COVID-19.

In the **third quarter** of 2021 and excluding the exchange rate effect, the Group's wholesale businesses as a whole generated a net attributable profit of €316m (-1.1% compared to the previous quarter). This development is mainly explained by a decrease in NTI in the quarter, as previously mentioned, affected by seasonality in Spain and lower results in Mexico and Peru, offset in part by better performance in net interest income, mainly thanks to the results of Global Markets in Mexico, sustained expenses and, in particular, the reversals in the impairment on financial assets, mainly originated in Turkey.

Alternative Performance Measures (APMs)

BBVA presents its results in accordance with the International Financial Reporting Standards (EU-IFRS). However, it also considers that some **Alternative Performance Measures** (hereinafter APMs) provide useful additional financial information that should be taken into account when evaluating performance. These APMs are also used when making financial, operational and planning decisions within the Entity. The Group firmly believes that they give a true and fair view of its financial information. These APMs are generally used in the financial sector as indicators for monitoring the assets, liabilities and economic and financial situation of entities.

BBVA Group's APMs are given below. They are presented in accordance with the European Securities and Markets Authority (**ESMA**) guidelines, published on October 5, 2015 (ESMA/2015/1415en) as well as the statement published by the ESMA on May 20, 2020 (ESMA 32-63-972), about implications of the COVID-19 outbreak on the half-yearly financial reports. The guidelines mentioned before are aimed at promoting the usefulness and transparency of APMs included in prospectuses or regulated information in order to protect investors in the European Union. In accordance with the indications given in the guidelines, BBVA Group's APMs:

- Include clear and readable definitions of the APMs.
- Disclose the reconciliations to the most directly reconcilable line item, subtotal or total presented in the financial statements of the corresponding period, separately identifying and explaining the material reconciling items.
- Are standard measures generally used in the financial industry, so their use provides comparability in the analysis of performance between issuers.
- Do not have greater preponderance than measures directly stemming from financial statements.
- Are accompanied by comparatives for previous periods.
- Are consistent over time.

Constant exchange rates

When comparing two dates or periods in this management report, the impact of changes in the exchange rates against the euro of the currencies of the countries in which BBVA operates is sometimes excluded, assuming that exchange rates remain constant. This is done for the amounts in the income statement by using the average exchange rate against the euro in the most recent period for each currency of the geographical areas in which the Group operates, and applying it to both periods; for amounts in the balance sheet and activity, the closing exchange rates in the most recent period are used.

Reconciliation of the Financial Statements of the BBVA Group

Below is the reconciliation between the consolidated Income Statements of the Condensed Interim Consolidated Financial Statements (hereinafter, the Consolidated Financial Statements) and the consolidated management Income Statements, shown throughout this report, for the first half of 2021 and 2020.

The main difference between the two is the treatment of the cost related to the restructuring process in the first half of 2021 which, for management purposes, are included in a single line, net of taxes, of the income statement called "Net cost related to the restructuring process", compared to the treatment in the income statement of the Consolidated Financial Statements, which record the gross impacts and their tax effect in the corresponding headings that are applicable to them in accordance with accounting regulations.

Additionally, there is a difference in the positioning of the results generated by BBVA USA and the rest of the companies included in the sale agreement to PNC until its closing, once the mandatory authorizations have been obtained, on June 1, 2021. In the Consolidated financial statements, these results are included in the line "Profit (loss) after tax from discontinued operations" and are taken into account both for the calculation of the "Profit/(loss)" and for the profit/(loss) "Attributable to the owners of the parent" whereas, for management purposes, they are not included in the "Profit/(loss) for the period", as they are included in a line below it, as can be seen in the following table.

(**) Depreciations included.

Profit / (loss) for the period

Explanation of the formula: The profit/(loss) for the period is the profit/(loss) for the period from the Group's consolidated income statement, which comprises the profit/(loss) after tax from continued operations and the profit/(loss) after tax from discontinued operations of BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: This measure is commonly used, not only in the banking sectors, for homogeneous comparison purposes.

Profit/(loss) for the period		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
(Millions of euros)	+ Annualized profit/(loss) after tax from continued operations ⁽¹⁾	5,270	3,789	3,555
(Millions of euros)	+ Annualized profit/(loss) after tax from discontinued operations ⁽²⁾	280	(1,729)	(2,013)
= Profit/(loss) for the period		5,550	2,060	1,542

(1) The cost related to the restructuring process not annualized.

(2) January-September 2021 only includes the results generated by BBVA USA and the rest of Group's companies in the United States included in the agreement until its sale to PNC as of June 1, 2021.

Adjusted profit/(loss) for the period

Explanation of the formula: The adjusted profit/(loss) for the period is the profit/(loss) from continued operations for the period from the Group's consolidated income statement, excluding those extraordinary items that, for management purposes, are defined at any given moment. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: This measure is commonly used, not only in the banking sector, for homogeneous comparison purposes.

Adjusted profit/(loss) for the period		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
(Millions of euros)	+ Annualized profit/(loss) after tax from continued operations	5,270	3,789	3,555
(Millions of euros)	- Net capital gains from the bancassurance transaction	—	304	—
(Millions of euros)	- Net cost related to the restructuring process	(696)	—	—
= Adjusted profit/(loss) for the period		5,966	3,485	3,555

Net attributable profit/(loss)

Explanation of the formula: The net attributable profit/(loss) is the net attributable profit/(loss) of the Group's consolidated income statement from continued operations and the profit/(loss) after tax from discontinued operations of BBVA USA and the rest of Group's companies in the United States sold to PNC on June 1, 2021. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: This measure is commonly used, not only in the banking sector, for homogeneous comparison purposes.

Net attributable profit/(loss)		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
(Millions of euros)	+ Annualized net attributable profit/(loss) from continued operations ⁽¹⁾	4,288	3,033	2,692
(Millions of euros)	+ Annualized net attributable profit/(loss) from discontinued operations ⁽²⁾	280	(1,729)	(2,013)
= Net attributable profit/(loss)		4,567	1,305	680

(1) The cost related to the restructuring process not annualized.

(2) January-September 2021 only includes the results generated by BBVA USA and the rest of Group's companies in the United States included in the agreement until its sale to PNC as of June 1, 2021.

Adjusted net attributable profit/(loss)

Explanation of the formula: The adjusted net attributable profit/(loss) is the net attributable profit/(loss) of the Group's consolidated income statement from continued operations excluding those extraordinary items that, for management purposes are defined at any given moment. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: This measure is commonly used, not only in the banking sector, for comparison purposes.

Adjusted net attributable profit/(loss)		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
(Millions of euros)	+ Annualized net attributable profit/(loss) from continued operations	4,288	3,033	2,692
(Millions of euros)	- Net capital gains from the bancassurance transaction	—	304	—
(Millions of euros)	- Net cost related to the restructuring process	(696)	—	—
= Adjusted net attributable profit/(loss)		4,983	2,729	2,692

ROE

The ROE (return on equity) ratio measures the return obtained on an entity's shareholders' funds plus accumulated other comprehensive income. It is calculated as follows:

$$\frac{\text{Net attributable profit/(loss)}}{\text{Average shareholders' funds} + \text{Average accumulated other comprehensive income}}$$

Explanation of the formula: The numerator is the net attributable profit/(loss) previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average shareholders' funds are the weighted moving average of the shareholders' funds at the end of each month of the period analyzed, adjusted to take into account the execution of the "dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results.

Average accumulated other comprehensive income is the moving weighted average of "Accumulated other comprehensive income", which is part of the equity on the Entity's balance sheet and is calculated in the same way as average shareholders' funds (above).

Relevance of its use: This ratio is very commonly used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds.

ROE		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	= Annualized net attributable profit/(loss)	4,567	1,305	680
Denominator (Millions of euros)	+ Average shareholder's funds	60,021	57,626	57,450
	+ Average accumulated other comprehensive income	(15,064)	(12,858)	(12,391)
= ROE		10.2 %	2.9 %	1.5 %

Adjusted ROE

The adjusted ROE (return on equity) ratio measures the return obtained on an entity's shareholders' funds plus accumulated other comprehensive income. It is calculated as follows:

$$\frac{\text{Adjusted net attributable profit/(loss)}}{\text{Average shareholders' funds} + \text{Average accumulated other comprehensive income}}$$

Explanation of the formula: The numerator is the adjusted net attributable profit/(loss) previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average shareholders' funds are the weighted moving average of the shareholders' funds at the end of each month of the period analyzed, adjusted to take into account the execution of the "dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results.

Average accumulated other comprehensive income is the moving weighted average of "Accumulated other comprehensive income", which is part of the equity on the entity's balance sheet and is calculated in the same way as average shareholders' funds (above).

Relevance of its use: This ratio is very commonly used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds.

Adjusted ROE		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	= Adjusted net attributable profit/(loss)	4,983	2,729	2,692
Denominator (Millions of euros)	+ Average shareholder's funds	60,021	57,626	57,450
	+ Average accumulated other comprehensive income	(15,064)	(12,858)	(12,391)
	= Adjusted ROE	11.1 %	6.1 %	6.0 %

ROTE

The ROTE (return on tangible equity) ratio measures the return on an entity's shareholders' funds, plus accumulated other comprehensive income, and excluding intangible assets. It is calculated as follows:

$$\frac{\text{Net attributable profit/(loss)}}{\text{Average shareholders' funds} + \text{Average accumulated other comprehensive income} - \text{Average intangible assets}}$$

Explanation of the formula: The numerator "Net attributable profit/(loss)" and the items in the denominator "Average intangible assets" and "Average accumulated other comprehensive income" are the same items and are calculated in the same way as explained for ROE.

Average intangible assets are the intangible assets on the balance sheet, including goodwill and other intangible assets. The average balance is calculated in the same way as explained for shareholders' funds in ROE.

Relevance of its use: This metric is generally used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds, not including intangible assets.

ROTE		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Annualized net attributable profit/(loss)	4,567	1,305	680
	+ Average shareholder's funds	60,021	57,626	57,450
	+ Average accumulated other comprehensive income	(15,064)	(12,858)	(12,391)
Denominator (Millions of euros)	- Average intangible assets	2,286	2,480	2,532
	- Average intangible assets from BBVA USA and BBVA Paraguay ⁽¹⁾	1,199	2,528	2,699
	= ROTE	11.0 %	3.3 %	1.7 %

(1) BBVA Paraguay includes 4 millions of euros as of January-December 2020 and January-September 2020.

Adjusted ROTE

The adjusted ROTE (return on tangible equity) ratio measures the return on an entity's shareholders' funds, plus accumulated other comprehensive income, and excluding intangible assets. It is calculated as follows:

$$\frac{\text{Adjusted net attributable profit/(loss)}}{\text{Average shareholders' funds} + \text{Average accumulated other comprehensive income} - \text{Average intangible assets}}$$

Explanation of the formula: The numerator is the adjusted net attributable profit/(loss) previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average intangible assets are the intangible assets on the balance sheet, excluding the assets from BBVA USA and the rest of Group's companies in the United States included in the sale agreement signed with PNC, whose sale took place on June 1, 2021. The average balance is calculated in the same way as explained for shareholders' funds in ROE.

Relevance of its use: This metric is generally used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds, not including intangible assets.

Adjusted ROTE		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	= Adjusted net attributable profit/(loss)	4,983	2,729	2,692
	+ Average shareholder's funds	60,021	57,626	57,450
Denominator (Millions of euros)	+ Average accumulated other comprehensive income	(15,064)	(12,858)	(12,391)
	- Average intangible assets	2,286	2,480	2,532
	- Average intangible assets from BBVA Paraguay	—	4	4
= Adjusted ROTE		11.7 %	6.5 %	6.3 %

ROA

The ROA (return on assets) ratio measures the return obtained on an entity's assets. It is calculated as follows:

$$\frac{\text{Profit/(loss) for the period}}{\text{Average total assets}}$$

Explanation of the formula: The numerator is the profit/(loss) for the period, previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator must be annualized.

Average total assets are taken from the Group's consolidated balance sheet. The average balance is calculated as explained for average shareholders' funds in the ROE.

Relevance of its use: This ratio is generally used not only in the banking sector but also in other sectors to measure the return obtained on assets.

ROA		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Annualized profit/(loss) for the period	5,550	2,060	1,542
Denominator (Millions of euros)	Average total assets	689,188	729,833	729,756
ROA		0.81 %	0.28 %	0.21 %

Adjusted ROA

The adjusted ROA (return on assets) ratio measures the return obtained on an entity's assets. It is calculated as follows:

$$\frac{\text{Adjusted profit/(loss) for the period}}{\text{Average total assets}}$$

Explanation of the formula: The numerator is the adjusted profit/(loss) for the period previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average total assets are taken from the Group's consolidated balance sheets, excluding the assets from BBVA and the rest of Group's companies in the United States included in the sale agreement signed with PNC, whose sale took place on June 1, 2021. The average balance is calculated in the same way as explained for average equity in ROE.

Relevance of its use: This ratio is generally used not only in the banking sector but also in other sectors to measure the return obtained on assets.

Adjusted ROA		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Adjusted profit/(loss) for the period	5,966	3,485	3,555
Denominator (Millions of euros)	Average total assets	637,820	642,762	642,438
Adjusted ROA		0.94 %	0.54 %	0.55 %

RORWA

The RORWA (return on risk-weighted assets) ratio measures the accounting return obtained on average risk-weighted assets. It is calculated as follows:

$$\frac{\text{Profit/(loss) for the period}}{\text{Average risk-weighted assets}}$$

Explanation of the formula: The numerator is the profit/(loss) for the period previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average risk-weighted assets (RWA) are the moving weighted average of the risk-weighted assets at the end of each month of the period under analysis.

Relevance of its use: This ratio is generally used in the banking sector to measure the return obtained on RWA.

RORWA		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Annualized profit/(loss) for the period	5,550	2,060	1,542
Denominator (Millions of euros)	Average RWA	332,672	358,675	362,393
RORWA		1.67 %	0.57 %	0.43 %

Adjusted RORWA

The adjusted RORWA (return on risk-weighted assets) ratio measures the return obtained on an entity's assets. It is calculated as follows:

$$\frac{\text{Adjusted profit/(loss) for the period}}{\text{Average risk-weighted assets}}$$

Explanation of the formula: The numerator is the adjusted profit/(loss) for the period previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average risk-weighted assets (RWA) are the moving weighted average of the risk-weighted assets at the end of each month of the period under analysis, excluding the RWA from BBVA USA and the rest of Group's companies in the United States included in the sale agreement signed with PNC, whose sale took place on June 1, 2021.

Relevance of its use: This ratio is generally used not only in the banking sector but also in other sectors to measure the return obtained on assets.

Adjusted RORWA		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Adjusted profit/(loss) for the period	5,966	3,485	3,555
Denominator (Millions of euros)	Average RWA	299,858	300,518	303,322
Adjusted RORWA		1.99 %	1.16 %	1.17 %

Earning per share

The earning per share is calculated in accordance to the criteria established in the IAS 33 "Earnings per share".

Earnings/(losses) per share		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
(Millions of euros)	+ Net attributable profit/(loss)	3,311	1,305	(15)
(Millions of euros)	+ Remuneration related to the Additional Tier 1 securities	279	387	287
Numerator (millions of euros)	= Net attributable profit/(loss) ex.CoCos remuneration	3,032	917	(302)
Denominator (millions)	+ Average number of shares	6,668	6,668	6,668
	- Average treasury shares of the period	11	13	11
	= Earnings/(losses) per share (euros)	0.46	0.14	(0.05)

Additionally, for management purposes, earnings per share are presented excluding: (I) the profit after tax from discontinued operations, that is, the results generated by BBVA USA and the rest of the Group companies in the United States until their sale to PNC on June 1, 2021, for the three broken down periods; (II) the capital gain net of taxes from the bancassurance operation with Allianz registered in the fourth quarter of fiscal year 2020; and (III) the net cost related to the restructuring process recorded in the second quarter of fiscal year 2021.

Earnings/(losses) per share excluding non-recurring impacts		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
(Millions of euros)	+ Net attributable profit/(loss) ex. CoCos remuneration	3,032	917	(302)
(Millions of euros)	- Discontinued operations	280	(1,729)	(2,031)
(Millions of euros)	- Corporate operations	—	304	—
(Millions of euros)	- Net cost related to the restructuring process	(696)	—	—
Numerator (millions of euros)	= Net Attributable profit ex.CoCos and non-recurring impacts	3,448	2,342	1,729
Denominator (millions)	+ Average number of shares	6,668	6,668	6,668
	- Average treasury shares of the period	11	13	11
	= Earnings/(losses) per share excluding non-recurring impacts (euros)	0.52	0.35	0.26

Efficiency ratio

This measures the percentage of gross income consumed by an entity's operating expenses. It is calculated as follows:

$$\frac{\text{Operating expenses}}{\text{Gross income}}$$

Explanation of the formula: Both "Operating expenses" and "Gross income" are taken from the Group's consolidated income statement. Operating expenses are the sum of the administration costs (personnel expenses plus other administrative expenses) plus depreciation. Gross income is the sum of net interest income, net fees and commissions, net trading income dividend income, share of profit or loss of entities accounted for using the equity method, and other operating income and expenses. For a more detailed calculation of this ratio, the graphs on "Results" section of this report should be consulted, one of them with calculations with figures at current exchange rates and another with the data at constant exchange rates.

Relevance of its use: This ratio is generally used in the banking sector. In addition, it is an indicator from one of the six Strategic Priorities of the Group.

Efficiency ratio		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Operating expenses	6,976	9,088	6,823
Denominator (Millions of euros)	Gross income	15,589	20,166	15,620
	Efficiency ratio	44.7 %	45.1 %	43.7 %

Dividend yield

This is the remuneration given to the shareholders in the last twelve calendar months, divided by the closing price for the period. It is calculated as follows:

$$\frac{\sum \text{Dividend per share over the last twelve months}}{\text{Closing price}}$$

Explanation of the formula: The remuneration per share takes into account the gross amounts per share paid out over the last twelve months, both in cash and through the flexible remuneration system called "dividend option".

Relevance of its use: This ratio is generally used by analysts, shareholders and investors for companies that are traded on the stock market. It compares the dividend paid out by a company every year with its market price at a specific date.

Dividend yield		30-09-21	31-12-20	30-09-20
Numerator (Euros)	Σ Dividends	0.06	0.16	0.26
Denominator (Euros)	Closing price	5.72	4.04	2.37
=	Dividend yield	1.0 %	4.0 %	11.0 %

Book value per share

The book value per share determines the value of a company on its books for each share held. It is calculated as follows:

$$\frac{\text{Shareholders' funds} + \text{Accumulated other comprehensive income}}{\text{Number of shares outstanding} - \text{Treasury shares}}$$

Explanation of the formula: The figures for both "Shareholders' funds" and "Accumulated other comprehensive income" are taken from the balance sheet. Shareholders' funds are adjusted to take into account the execution of the "dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results. The denominator includes the final number of outstanding shares excluding own shares (treasury shares). The denominator is also adjusted to include the capital increase resulting from the execution of the dividend options explained above. Both the numerator and the denominator take into account period-end balances.

Relevance of its use: It shows the company's book value for each share issued. It is a generally used ratio, not only in the banking sector but also in others.

Book value per share		30-09-21	31-12-20	30-09-20
Numerator (Millions of euros)	+ Shareholders' funds	60,622	58,904	57,669
	+ Dividend-option adjustment	—	—	—
	+ Accumulated other comprehensive income	(15,684)	(14,356)	(14,552)
Denominator (Millions of shares)	+ Number of shares outstanding	6,668	6,668	6,668
	+ Dividend-option	—	—	—
	- Treasury shares	16	14	30
=	Book value per share (euros / share)	6.76	6.70	6.50

Tangible book value per share

The tangible book value per share determines the value of the company on its books for each share held by shareholders in the event of liquidation. It is calculated as follows:

$$\frac{\text{Shareholders' funds} + \text{Accumulated other comprehensive income} - \text{Intangible assets}}{\text{Number of shares outstanding} - \text{Treasury shares}}$$

Explanation of the formula: The figures for "Shareholders' funds", "Accumulated other comprehensive income" and "Intangible assets" are all taken from the balance sheet. Shareholders' funds are adjusted to take into account the execution of the "Dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results. The denominator includes the final number of shares outstanding excluding own shares (treasury shares). The denominator is also adjusted to include the result of the capital increase resulting from the execution of the dividend options explained above. Both the numerator and the denominator take into account period-end balances.

Relevance of its use: It shows the company's book value for each share issued, after deducting intangible assets. It is a generally used ratio, not only in the banking sector but also in others.

Tangible book value per share		30-09-21	31-12-20	30-09-20
Numerator (Millions of euros)	+ Shareholders' funds	60,622	58,904	57,669
	+ Dividend-option adjustment	—	—	—
	+ Accumulated other comprehensive income	(15,684)	(14,356)	(14,552)
	- Intangible assets	2,271	2,345	2,326
	- Intangible assets from BBVA USA and BBVA Paraguay ⁽¹⁾	—	1,952	2,047
Denominator (Millions of shares)	+ Number of shares outstanding	6,668	6,668	6,668
	+ Dividend-option	—	—	—
	- Treasury shares	16	14	30
= Tangible book value per share (euros / share)		6.41	6.05	5.84

(1) BBVA Paraguay includes 3 millions of euros as of 31-12-20 and 30-09-20.

Non-performing loan (NPL) ratio

It is the ratio between the risks classified for accounting purposes as non-performing loans and the total credit risk balance, both excluding the balances from BBVA USA and the rest of the Group's companies in the United States included in the sale agreement signed with PNC, which was completed on June 1, 2021. It is calculated as follows:

$$\frac{\text{Non-performing loans}}{\text{Total credit risk}}$$

Explanation of the formula: non-performing loans and the credit risk balance are gross, meaning they are not adjusted by associated accounting provisions.

Non-performing loans are calculated as the sum of "loans and advances at amortized cost" and the "contingent risk" in stage 3⁶ and the following counterparties:

- other financial entities
- public sector
- non-financial institutions
- households

The credit risk balance is calculated as the sum of "Loans and advances at amortized cost" and "Contingent risk" in stage 1 + stage 2 + stage 3 of the previous counterparts.

This indicator is shown, as others, at a business area level.

Relevance of its use: This is one of the main indicators used in the banking sector to monitor the current situation and changes in credit risk quality, and specifically the relationship between risks classified in the accounts as non-performing loans and the total balance of credit risk, with respect to customers and contingent liabilities.

⁶ IFRS 9 classifies financial instruments into three stages, which depend on the evolution of their credit risk from the moment of initial recognition. The stage 1 includes operations when they are initially recognized, stage 2 comprises operations for which a significant increase in credit risk has been identified since their initial recognition and stage 3, impaired operations.

Non-Performing Loans (NPLs) ratio		30-09-21	31-12-20	30-09-20
Numerator (Millions of euros)	NPLs	14,864	15,451	15,006
Denominator (Millions of euros)	Credit Risk	371,708	366,883	365,127
=	Non-Performing Loans (NPLs) ratio	4.0 %	4.2 %	4.1 %

NPL coverage ratio

This ratio reflects the degree to which the impairment of non-performing loans has been covered in the accounts via allowances, excluding assets from BBVA USA and the rest of the Group's companies in the United States included in the sale agreement signed with PNC, which was completed on June 1, 2021. It is calculated as follows:

$$\frac{\text{Provisions}}{\text{Non-performing loans}}$$

Explanation of the formula: It is calculated as "Provisions" from stage 1 + stage 2 + stage 3, divided by non-performing loans, formed by "credit risk" from stage 3.

This indicator is shown, as others, at a business area level.

Relevance of its use: This is one of the main indicators used in the banking sector to monitor the situation and changes in the quality of credit risk, reflecting the degree to which the impairment of non-performing loans has been covered in the accounts via value adjustments.

NPL coverage ratio		30-09-21	31-12-20	30-09-20
Numerator (Millions of euros)	Provisions	11,895	12,595	12,731
Denominator (Millions of euros)	NPLs	14,864	15,451	15,006
=	NPL coverage ratio	80 %	82 %	85 %

Cost of risk

This ratio indicates the current situation and changes in credit-risk quality through the annual cost in terms of impairment losses (accounting loan-loss provisions) of each unit of loans and advances to customers (gross). It excludes the risk attributable to BBVA USA and the rest of the Group's companies in the United States included in the sale agreement signed with PNC, which was completed on June 1, 2021. It is calculated as follows:

$$\frac{\text{Annualized loan-loss provisions}}{\text{Average loans and advances to customers (gross)}}$$

Explanation of the formula: "Loans to customers (gross)" refers to the "Loans and advances at amortized cost" portfolios with the following counterparts:

- other financial entities
- public sector
- non-financial institutions
- households, excluding central banks and other credit institutions.

Average loans to customers (gross) is calculated by using the average of the period-end balances of each month of the period analyzed plus the previous month. "Annualized loan-loss provisions" are calculated by accumulating and annualizing the loan-loss provisions of each month of the period under analysis.

Loan-loss provisions refer to the aforementioned loans and advances at amortized cost portfolios.

This indicator is shown, as others, at a business area level.

Relevance of its use: This is one of the main indicators used in the banking sector to monitor the situation and changes in the quality of credit risk through the cost over the year.

Cost of risk		Jan.-Sep.2021	Jan.-Dec.2020	Jan.-Sep.2020
Numerator (Millions of euros)	Annualized loan-loss provisions	2,969	5,160	5,601
Denominator (Millions of euros)	Average loans to customers (gross)	324,022	332,096	334,298
=	Cost of risk	0.92 %	1.55 %	1.68 %
